

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## PREFACE

This book, a missionary to the country folk, will, if used carefully and wisely, save many a dollar, and enable them to have always on hand the best of canned goods, jellies, preserves and fruit juices.

It will also be useful to the town dweller where fresh vegetables can be purchased, at moderate prices, during the summer months. It is unfortunate that so many people use food put up at factories. Many of these are clean and use fruit of good quality, to be sure; but if the work is done at home, one knows that all materials are first-class, and then there is a comfort in having a closet filled with materials easy of access.

The maxim that "practice makes perfect" applies most admirably to canning and preserving. While the recipes contained in this book are written as simply and explicitly as possible, to insure perfect success the paragraphs at the beginning of each division must be read and re-read until they are thoroughly understood.

SARAH TYSON RORER

*Mount Gretna, 1911.*

## CANNING

Canning is an improvement upon the old-fashioned method of preserving fruits pound for pound in sugar. It retains more of the fresh and natural flavor, is far less troublesome to do, and more economical. All fruits may be canned with or without sugar, as a thin syrup takes no part whatever in the preservation of fruits.

Canned fruits must be sterile, and in the ordinary household this can easily be accomplished by heat. There are a few golden rules to be followed, and then canning of both fruit and vegetables becomes easy to every housewife.

Choose only perfectly sound, fresh fruits.

Select jars with solid tops, either glass or metal.

Purchase the best quality of rubbers, and use new rubbers each year.

Use only granulated sugar, unless the recipe specifies loaf sugar.

All large fruits, as soon as they are pared, should be immersed in cold water to prevent discoloration.

Small fruits retain their shape more perfectly if they are sugared one or two hours before cooking, or if they are cooked in the jars.

Use a porcelain-lined kettle, broad rather than deep. Brass or bell-metal is best, but such kettles must be thoroughly cleansed each time they are used.

Small oil, charcoal or gas stoves are most convenient for canning, preserving or jelly making. The kettle being immediately over an even, intense heat, the contents boil quickly and evenly, thus saving time, and retaining the color and flavor of the fruits.

For canning vegetables and most fruits, use an ordinary copper bottomed wash boiler, the bottom of which should be protected or covered with a wooden or metal rack. This prevents the breakage of jars.

Large-mouthed glass jars should be used for whole fruits, and such vegetables as asparagus, whole tomatoes and corn on the cob.

All jars should be thoroughly washed, rinsed and heated before filling. Fill one jar at a time, through a wide-mouthed funnel, to overflowing. Sterilize a silver knife by dipping it into boiling water and pass it quickly around the inside of the jar to break any air bubbles that may be there, and put the tops on without delay.

Adjust the rubbers before filling the jar, and remove the covers at the last minute from a kettle of boiling water.

Stand the jars, while filling, on a folded towel, to prevent breakage.

After sealing the jars, stand them out of all draft, over night. In the morning tighten each cover, as the glass will contract while cooling.

Keep all fruits, canned and preserved, in a light, perfectly dry, clean closet.

In a week examine each jar carefully, without shaking or disturbing more than necessary. If you find the lids slightly indented or in the glass jars the contents free from air bubbles, the liquid settled, you may rest assured that the fruit is keeping. If you find the opposites, open the jars immediately to prevent bursting. This fruit may be re-cooked and used at once, but is never satisfactory if re-canned.

The surplus juices that exude from small fruits, such as strawberries, raspberries and plums, may be strained, boiled fifteen or twenty minutes and bottled or jarred to use during the winter for pudding sauces and ice creams.

If the directions in each recipe are carefully followed, and surgical cleanliness is observed, not one can in a hundred will be lost.

## CANNING FRUITS

### APPLES

4 pounds of apples

The juice of one lemon

1 pound of sugar

1 quart of water

It is wise always to use apples that will not keep in any other way until the winter season. It would be foolish indeed to can apples that could be kept fresh by simply being put into cold storage or the cellar.

Pare, core and throw the apples into cold water. When you have sufficient to fill a dozen jars, or as many as your boiler will hold, drain off the water, fill them at once into the jars, fill the jars with cold water. Add the lemon juice, a little to each jar, adjust the rubbers, lay on the tops. Stand the jars in the wash boiler, surround them half way up with cold water, cover the boiler, bring to a boil and boil continuously thirty minutes. Lift the jars and screw down the lids, without lifting the lids. Turn them on their sides in the boiler, and boil thirty minutes. The sugar may be dissolved in the water, instead of using plain water, allowing a pound to each four pounds of apples.

**APPLES WITH QUINCES**

4 pounds of apples	1 pound of sugar
1 pound of quinces	1 quart of water

Pare, quarter and core the apples, throw them into the water to prevent discoloration. Pare the quinces, quarter, and remove the cores. Cut the quinces into thin slices, put them into a porcelain-lined kettle with the water, stew gently a half hour, then add the sugar, then the apples. Cover the boiler and let them *simmer* gently until the apples are tender, but whole. Have ready perfectly clean, heated jars. Have the rubbers and lids in boiling water. Stand a jar on a folded towel, on a plate, adjust the rubber, fill it with the apples and quinces to overflowing; take the lid from the boiling water and put it directly on the jar; do not rest it on the table; do not wipe it with a clean towel or napkin; these towels and napkins may contain a little dust with the wild yeast plant; one plant will spoil an entire jar.

**APPLES WITH PINEAPPLE**

4 pounds of apples	1¼ pounds of sugar
1 good-sized pineapple	1 quart of water

Pare, core, and quarter the apples. Pare the pineapple, and with a silver knife carefully remove the eyes, then grate it. Cover the apples with boiling

water, bring quickly to a boil, then *simmer* gently for five minutes. Put the sugar and water in another kettle, stir constantly until the sugar is dissolved, then add the grated pineapple, and bring the whole to boiling-point. Lift the apples, drain, and slide them carefully into the syrup. *Simmer* until the apples are tender, and can as directed.

These are delicious.

### APRICOTS

Proceed precisely the same as for canned Apples, omitting the lemon.

### BLACKBERRIES

To every pound of blackberries allow a quarter-pound of sugar. Put the berries in a porcelain-lined kettle, cover them with the sugar, and let stand one or two hours, then place over a moderate fire, and bring to boiling-point. Skim, and can immediately as directed.

### CHERRIES

Stone the cherries; and, if pie or morello cherries, allow a half-pound of sugar to every pound of cherries. If ox-hearts, a quarter-pound of sugar. Proceed the same as for Blackberries.

**CURRENTS**

Stem the currents, and to every pound allow three-quarters of a pound of sugar. Cover the currents with the sugar and let them stand two hours, then put them in a porcelain-lined kettle and bring quickly to boiling-point. Do not stir. Skim, and can quickly as directed.

**CURRENTS AND RASPBERRIES**

To every quart of the large red raspberries allow a half-pint of current-juice and a half-pound of sugar. Put the berries in a porcelain-lined kettle, add the juice and sugar, bring to boiling-point, and can.

**DAMSONS**

Stem and wash the damsons, and to every five pounds allow three pounds of sugar. Cover the damsons with the sugar and let stand four hours or over night. Put them in a porcelain-lined kettle, cooking only sufficient to fill one jar at a time. Bring slowly to boiling-point, *simmer* until the damsons are soft without being broken. Skim, and can as directed.

**DEWBERRIES**

Dewberries are canned precisely the same as Blackberries.

### ELDERBERRIES

To every four pounds of berries allow one pound of sugar. Finish, and can the same as Blackberries.

### GREENGAGES

To every pound of greengages allow three-quarters of a pound of sugar. Wash the greengages in cold water, drain, and with a large pin puncture each one in four or five places. Then put a layer in the bottom of a bowl, sprinkle with sugar, then another layer of greengages, another of sugar, and so on until all is used. Cover and stand away over night. In the morning put them into a porcelain-lined kettle, bring quickly to boiling-point, skim, and can as directed, cooking only sufficient to fill one jar at a time.

Yellowgages may be canned in precisely the same way.

### GOOSEBERRIES (Green)

As these are usually canned for pies, they are better sealed without sugar, that it may be added fresh at the time of using.

Stem, wash, and drain the gooseberries; put them in a porcelain-lined kettle, bring quickly to boiling-point, and can as directed.

**GOOSEBERRIES (Ripe)**

Ripe gooseberries should be canned precisely the same as Blackberries, allowing a half pound of sugar to each pound of gooseberries.

**HUCKLEBERRIES**

Huckleberries should be canned the same as Blackberries.

**PEACHES No. 1**

4 pounds of peaches      1 pound of sugar  
1 quart of water

Pare the peaches, remove the stones, and throw them into cold water. Put the sugar and water into a porcelain-lined kettle, stand it over the fire and stir constantly until the sugar is dissolved; drain the peaches, put them in the syrup, bring quickly to a boil, then stand on the back part of the fire, where they will scarcely bubble, until tender. When tender lift each piece carefully and arrange in the jars, then fill the jar quickly to overflowing with the syrup, seal, and stand aside to cool.

**PEACHES No. 2**

4 pounds of peaches      1 pound of sugar  
1 quart of water

Pare the peaches, remove the stones, and throw them into cold water. Stir the sugar into the water until thoroughly dissolved. Drain the peaches and

arrange them nicely in the jars. Fill each jar two-thirds full with the syrup. Place some folded hay or straw in the bottom of a wash-kettle, or use a rack, stand the jars on top of this and pour around sufficient cold water to two-thirds cover the jar. Put a close cover on top of the kettle, and place on a moderate fire. As soon as the water around the jars thoroughly boils, remove one jar at a time; if the fruit has settled leaving a space unfilled, fill up from another jar as need requires, adding sufficient liquor as well. Seal without delay, and stand aside to cool.

#### PEARS

Bartletts are best for canning. Pare, cut in halves, and with a pointed knife remove the core and blossom end. The stem may be left, as they look very pretty. Throw them at once into cold water to prevent discoloration. When you have pared sufficient to make one quart jar, about twenty-one halves, weigh them, allowing a quarter-pound of sugar to every pound of pears. Put the pears in a porcelain-lined kettle, cover with boiling water, and *simmer* gently until you can pierce them with a straw. Put the sugar and a pint of water into another kettle, stir until dissolved, then boil and skim. When the pears are tender, lift carefully with a skimmer and slide them into the syrup, *simmer* five minutes, can and seal as directed.

**PINEAPPLES**

With a silver knife pare the pineapples and carefully remove the eyes. Then pick them into small pieces, rejecting the core. Weigh, and to every pound allow three-quarters of a pound of sugar. Put the sugar and pineapple together in a porcelain-lined kettle, bring quickly to boiling-point, then *simmer* over a moderate fire ten minutes. Can as directed.

**PLUMS (Blue)**

Allow three-quarters of a pound of sugar to every pound of plums. Proceed as for Damsons.

All large plums may be canned in the same manner, first pricking the skins to prevent cracking.

**QUINCES**

Pare, core, and quarter the quinces, or they may be cut into rings, throw them at once into cold water to prevent discoloration. Save the parings and the knotty pieces for jelly, being careful to reject the core and seeds, as they prevent the liquid from jelling. When you have pared sufficient to make one or two jars, take them from the water, put them in a porcelain-lined kettle, cover with boiling water, bring quickly to a boil, then stand on the back part of the fire where they will *simmer* gently,

until you can pierce them with a straw. While they are cooking, put the sugar and water in another kettle, allowing a half-pound of sugar and a half-pint of water to each pound of quinces. Stir the sugar until dissolved, then boil and skim. Lift the quinces from the water, put them in the syrup, *simmer* ten minutes, and can as directed. If you are canning several jars, they should all be boiled in the same water, and this water saved to boil the skins for jelly. Of course, fresh syrup must be made for each lot.

### RASPBERRIES

Select the large red berries, pick carefully and put into small glass jars, a layer of berries and a sprinkling of sugar, allowing to each pint of berries about two heaping tablespoonfuls of sugar. Finish precisely the same as Peaches No. 2.

### STRAWBERRIES No. 1

Can the same as Blackberries, using a half-pound of sugar to every pound of strawberries.

### STRAWBERRIES No. 2

Can the same as Raspberries, allowing a half-pound of sugar to every pound of strawberries.

## CANNING VEGETABLES

I feel that extra directions must be given for vegetables, and I shall ask the housewife to read these directions before beginning the canning of any vegetable. Surgical cleanliness must be observed. One point neglected, and the contents of the jar is lost. Where directions are followed carefully, the canning of vegetables becomes as easy as the canning of fruits.

### STRING OR SNAP BEANS

Select perfectly fresh beans, string and cut them as desired, throw them into a kettle of boiling water and boil rapidly fifteen minutes and drain. While these are boiling, select your jars and lids and open the new rubbers. Wash the jars thoroughly in water in which you have dissolved a teaspoonful of baking soda to each quart, then wash the lids; rinse both thoroughly. Have ready two tea kettles of water that has been boiled and cooled. Fill the jars with the beans, then pour over as much water as the jar will hold, stand them in a wash boiler, the bottom of which has been protected by a rack, surround the jars half way up with cold water, lay on the lids, cover the boiler, bring quickly to boiling-point and boil continuously one hour. Lift the jars, and in

lifting the lid be careful that you turn it upside down on a sterilized plate; dip an ordinary tin plate in boiling water, turn the lid upside down on it while you adjust the rubber. Put the rubbers on a fork, dip them up and down several times in boiling water and hang them across the kettle. Take one at a time, adjust it, turn the lid over and screw it quickly and put the jar back into the boiler, this time on its side. When you have finished the last jar, cover the boiler and boil again for thirty minutes. If you are not going to use the boiler again, remove it from the fire, lift the lid and let the jars cool in the boiler. On the other hand, they may be lifted at once and put on a table out of a draft; the draft of course will cause breakage. Next morning wipe off the jars, examine the tops to see if they are tight, and stand them away in your fruit closet.

The lifting of the jars from the boiling water is rather an uncomfortable operation, unless you use a Rorer canning basket, or some wire apparatus with handles.

### ASPARAGUS

Select fresh, perfect asparagus, wash and peel it as you would for cooking. Tie the asparagus into small bundles, drop it into a porcelain-lined kettle partly filled with boiling water, add a teaspoonful of salt to each gallon of water. Boil rapidly ten minutes, drain, and arrange the asparagus into wide-

mouthed jars, butts down. Fill the jars to overflowing with cold boiled water, lay the tops on, stand them in the boiler, and finish precisely the same as string beans.

### **CORN**

Corn must be perfectly fresh, just picked from the stalks. Husk it, remove the silk, and score the grains, or with a sharp knife remove the tops and press out the pulp. Pack this pulp into perfectly clean jars, put the tops on loosely, stand the jars in your boiler as directed in preceding recipes, partly surround them with cold water and boil continuously two hours. Then adjust the rubbers, screw on the tops, turn the cans on their side so that they will be entirely covered with the boiling water, and boil continuously one hour.

### **GREEN PEAS**

Green peas must be fresh, packed into the jars, the jars filled with cold boiled water. They must be cooked exactly the same time as corn.

### **YOUNG LIMA BEANS**

These are canned precisely the same as green peas, and the period of cooking is exactly equal.

**TO CAN CORN AND TOMATOES**

Select one peck of fresh, ripe, perfect tomatoes. Put a few at a time into a colander or vegetable basket and plunge them up and down in a kettle of boiling water. Remove the skins, cut the tomatoes into halves and press out the seeds. Put the tomatoes into a porcelain-lined kettle, and stew them gently a half hour, stirring frequently. Have ready five or six dozen ears of corn that have been scored and the pulp pressed out. Mix the corn with the tomatoes, add a palatable seasoning of salt and pepper, and boil another half hour. Have ready the jars, lids and rubbers. Adjust the rubbers, stand one jar at a time on a folded cloth in the bottom of a pie dish, take it to the stove and fill it to overflowing through a wide-mouthed funnel, or you may use a canning spoon. Wash the tops in boiling water, and screw the top of each jar as soon as it is filled. Have ready your boiler and rack, have the boiler partly filled with boiling water, turn the cans on their sides quickly into this boiling water.

Put each can in as you fill it. Cover the boiler and boil one hour.

**CORN, TOMATOES AND OKRA**

This is an exceedingly good mixture to use as a vegetable in winter, or they may be used for gumbo or vegetable soup. Proceed as directed in preceding

recipe, adding the okra, which must be very young and tender, when you add the corn.

### **CANNED OKRA**

Select young, tender okra. Wash them, remove the stems, pack the okra into clean jars, lay on the tops and cook them as directed, in a boiler for one hour. Then adjust the rubbers, seal the jars and cook under water thirty minutes longer.

### **STEWED TOMATOES**

Proceed precisely the same as directed for stewed tomatoes with corn. After the tomatoes have cooked a half hour, add a palatable seasoning of salt and pepper. Fill one jar at a time, carrying the jar to the stove, adjust the rubber, screw on the top. The rubbers and tops must be dipped from boiling water.

There is little or no danger in canning tomatoes, as they contain sufficient acid to kill the ordinary wild yeast plants that cause most fruits to ferment. To make sure, however, it is well to immerse the jars in boiling water and boil for at least twenty minutes.

## TO CAN TOMATOES WHOLE

Select small, perfectly sound, fresh tomatoes. Dip them a few at a time into boiling water and remove the skins. Pack them into wide-mouthed jars, adjust the rubbers, fill the jars to overflowing with cold water, lay on the tops, stand them in the wash boiler on the rack, partly surround them with cold water, cover the boiler, bring to boiling-point and boil three minutes. Screw on the top, if possible, without lifting the jar. Cover the boiler, bring again to boiling-point and stand them aside to cool. If canned properly, these will be sufficiently solid to use for salads.

## MUSHROOMS

Select young, fresh *Agaricus campestris*, remove the stems, and if you like, peel the mushrooms. Pack these into clean glass jars, adjust the rubbers, and lay the tops on; do not fasten them. Stand the jars in a wash boiler, surround them half way with cold water, bring to a boil and boil continuously one hour. Then fill two jars from a third, or use a fourth if necessary. Screw down the tops, turn the jars over on their sides in the boiling water and boil another hour.

**BEETS**

Beets, turnips and young carrots may be canned precisely the same. Select tiny young beets, wash them without breaking the skins, cover them with boiling water, boil for a half hour; drain and skin. Pack these into glass jars, pour over the beets in each jar two tablespoonfuls of cider vinegar, and fill the jars with cold water. Adjust the rubbers, lay on the tops, stand them in the boiler, surround them half way with cold water, cover the boiler, bring to a boil and boil one hour. Screw the tops without lifting them, if possible. Turn them on their sides and boil thirty minutes longer.

For turnips and carrots, omit the vinegar, paring the turnips, and scraping the carrots. Both must be very tiny and young.

**TOMATO PASTE**

Scald and peel a half-peck of tomatoes, cut them into halves and press out the seeds. Put the tomatoes into a procelain-lined kettle, cook slowly, stirring occasionally until they are reduced to a very thick paste, almost like a dough. Be very careful that they do not scorch. Add two tablespoonfuls of salt, and pack them at once into half-pint glass jars, adjust the rubbers, fasten the tops, and put them quickly into a kettle of hot water. There must be

sufficient water to cover the jars. Bring to a boil, and boil continuously one hour.

This is sold at the grocers under the name of tomato conserve, and is used for spaghetti and macaroni, Italian fashion.

## PRESERVING

To preserve fruits use equal quantities of fruit and sugar, and cook sufficiently long to keep the fruit without it being hermetically sealed. Use only sound fruit and the very best white sugar. Granulated sugar is quite equal to the best loaf sugar for this work. Prepare the fruit with care, weigh accurately, work slowly, do only a few jars or tumblers at a time. Small fruits are better cooked in syrup made from the fruit juice and sugar; large fruits should be boiled in water until you can pierce them with a straw before they are put in the sugar.

### APPLES

Pare and core fine, ripe pippins, and cut them into quarters. Weigh, and to each pound allow one pound of granulated sugar and a half-pint of boiling water, the grated rind of one and the juice of two lemons. Boil the sugar and water until clear (about three minutes), skimming the scum from the surface, add the juice and rind of the lemons, then the apples, and *simmer* gently until they are clear

and tender, but not broken, put them into jars, fasten or seal, and put in a cool place to keep.

Apples are more difficult to keep than any other fruit.

### CRAB APPLES

Take Siberian crab apples when they are very ripe. Wash and drain; do not remove the stems, the cores must be extracted with a very small knife from the blossom end. Put them in a porcelain-lined kettle with sufficient boiling water to cover. *Simmer* very gently until the skins will peel off easily, then drain and peel them. Then weigh them, allow one and a quarter pounds of sugar, and a half pint of water to each pound of crab apples. Put the sugar and water into a porcelain-lined kettle, and stir until the sugar is dissolved, then bring quickly to boiling-point, and skim. Put in the crab apples, and *simmer* gently until clear and tender, skimming the scum from the surface. When done, put into jars or tumblers, and stand away to cool. When cold, fasten the same as Apples.

### BLACKBERRIES

Select the largest and finest berries. Pick, weigh them, and allow to each pound of berries a pound of sugar. Spread them out separately on flat dishes, sprinkle with the sugar, and stand aside for one

hour; then put them in a porcelain-lined kettle with all the juice that may have exuded; stand the kettle over the fire until the berries are slightly heated, then take them out one by one with a spoon and spread on the same flat dishes. When all are out, boil the syrup rapidly for five minutes, then add the berries, stand on the back part of the fire, where they cannot possibly boil, for about fifteen minutes. If they seem at all likely to break, take instantly from the fire, and stand aside to slightly cool. Then fill into tumblers or jars, and stand aside until perfectly cold. Fasten with tissue paper, and brush this with white of egg and water the same as for jellies.

### CHERRIES

Take large, ripe morello cherries, stone them, saving all the juice that comes from them. Weigh, and to each pound of cherries allow a pound of sugar. Put a layer of cherries in the bottom of a bowl, then sprinkle over a little sugar, then more cherries and sugar, and so continue until all is used. Stand aside for two or three hours, then put them into a porcelain-lined kettle, bring quickly to a boil, and *simmer* and skim until the cherries are clear and the syrup thick. Lift carefully each cherry with a teaspoon and put into tumblers or jars, and stand aside to cool. When cold, fasten with tissue paper as directed in preceding recipes.

**PRESERVED CITRON**

Pare off the outer skin, cut into halves, remove the seeds, then divide each half into a number of smaller pieces. Put them in a stone jar, add a half-cup of salt to every five pounds of citron. Cover with cold water and stand aside for five hours; then drain, and cover with fresh, cold water. Soak two hours, changing the water three or four times. Drain. Cover with boiling water, bring to boiling-point, and drain again. Make a syrup from two and a half pounds of granulated sugar and one and a half quarts of boiling water, boil and skim. When perfectly clear, put in the citron and *simmer* gently until you can pierce it with a straw. When tender, lift the pieces carefully with a skimmer, place them on a large plate, and stand in the sun one or two hours to harden. Peel the yellow rind from one large lemon, add it to the syrup, then add the juice of two lemons, and a small piece of green ginger-root cut in thin slices. Boil gently for ten minutes, and stand aside until wanted. When the citron has hardened, put it cold into the jars, bring the syrup again to a boil, and strain it over the citron.

Watermelon-rind and pumpkin may be preserved in the same manner.

### CURRANTS

Currants may be preserved precisely the same as Cherries.

White currants if properly done are delicious.

### DAMSONS

One pound of granulated sugar to every pound of damsons. Pick the stems from the damsons, put them into stone jars with the sugar sprinkled between each layer of damsons. Cover the jars and stand them in a kettle of cold water; bring slowly to boiling-point, and then *simmer* very gently until the damsons are tender without being broken. Pour off the juice and boil it rapidly fifteen minutes. Put the damsons carefully into tumblers or jars, strain the juice through a jelly-bag and pour it over. Stand aside to cool. When cold, cover the tops with tissue paper, brush over with the white of an egg, and stand aside to dry. Keep in a cool place.

### DEWBERRIES

Dewberries may be preserved precisely the same as Blackberries.

### GINGER

Take green ginger-root, pare it carefully with a sharp knife, throwing each piece, as you finish it, into a pan of cold water. When all is finished,

drain, put it in a porcelain-lined kettle, cover with cold water, and bring to boiling-point. Drain, throw it into cold water for a few moments, then cover again with boiling water, bring to a boil, drain, throw again into cold water. Again cover with boiling water, and *simmer* until the ginger is perfectly tender. Drain, and throw into cold water for an hour. To every pound of ginger allow one pound of sugar and one pint of water. Put the sugar and water in a porcelain-lined kettle and stir until the sugar is dissolved, then bring quickly to a boil. Beat the whites of two eggs in a half-cup of cold water until slightly frothy, then stir them into the boiling syrup. Boil and skim until clear, then stand aside to cool. Drain the ginger and dry it on a soft towel; throw it in the syrup, and stand away for two days. At the end of that time drain the syrup from the ginger, boil, and when cool pour it again over the ginger. Stand aside for twenty-four hours. Repeat this every day for five days, the fourth day heating the ginger in the syrup. When finished, put it into jars and cover closely.

### GREENGAGES

Weigh the greengages, and to each pound allow a pound of sugar. Put them in boiling water for a few moments, until the skins come off easily. Peel, and throw them into a large earthen bowl or jar,

sprinkling the sugar between each layer of gages. Stand aside over night. In the morning pour off the juice carefully, into a porcelain-lined kettle, bring quickly to a boil, skim it, and then add the gages. *Simmer* very gently, until tender and clear, about thirty minutes. Take them out one by one with a spoon and spread them on large dishes to cool. Boil the syrup a few minutes longer until thick. When the gages are cool, put them into tumblers or jars, pour over the boiling syrup, and seal, or tie up.

Yellowgages, copper plums, prunes, and blue plums may be preserved in the same manner.

### GOOSEBERRIES (Green)

Top and tail the gooseberries, wash in cold water, and drain. To every pound of gooseberries allow one and a quarter pounds of sugar and one and a half pints of water. Throw the gooseberries into a porcelain-lined kettle, cover with boiling water, and stand aside a few moments to scald. Put the sugar and water in another kettle to boil. As soon as it boils, skim and stand aside to cool. When the gooseberries feel tender, take them out carefully with a perforated skimmer, and slide them carefully into a pan of cold water. Let stand a few minutes, then lift them again with the skimmer and put them carefully into the syrup. Stand over a gentle fire and let *simmer* slowly for about twenty minutes or

until they are quite clear. If the gooseberries seem likely to break, take them out carefully, and allow the syrup to boil a few minutes longer. When done, put carefully into jars or tumblers, and stand aside to cool. When cold, tie up as directed.

### HUCKLEBERRIES

Wash and drain the huckleberries, then weigh, and to each pound allow three-quarters of a pound of sugar and the juice of half a lemon. Sprinkle one-half the sugar over the berries, and stand aside over night. In the morning drain off the juice, add the remaining sugar and the lemon-juice, and a half-pint of water, stir over the fire until the sugar is dissolved, bring quickly to a boil, skim, add the huckleberries, *simmer* gently until the berries are tender not broken, about thirty minutes. When done, put them in jars or tumblers, and stand aside to cool. When cold, tie up as directed.

### LEMONS

Select one dozen small lemons that are very ripe, and of uniform size. With a silver knife scoop out a hole from the stem end, and with your little finger loosen the pulp from inside rind, being careful not to disfigure or break the rind. While doing this hold the lemon over a bowl that all the juice may

be saved. After you have the pulp entirely loosened, pull it out leaving the rind of the lemon whole. Throw each as it is finished in a pan of cold water, then drain and put in a porcelain-lined kettle. Dissolve an even teaspoonful of salt in two quarts of boiling water, pour it over the rinds, and *simmer* gently until clear and nearly transparent, then drain, and throw them again in cold water for three hours, changing the water every hour, then stand them aside in the water over night. In the morning drain, and cover with boiling water, and *simmer* gently for one and a half hours, then drain, and weigh the rinds, and to every pound allow one pound of granulated sugar and a half-pint of water. Put the sugar and water in a kettle and stand over the fire, stir until the sugar is dissolved, then bring quickly to a boil and skim, add the lemon rinds, and all the juice from the pulp. *Simmer* gently until the rinds are clear and tender, then take them out singly and spread on flat dishes and stand the syrup aside for two days. Then roll four dozen juicy ripe lemons, cut them in halves, and squeeze out all the juice. To each pint of this juice allow one and a quarter pounds of granulated sugar. Put both into a porcelain-lined kettle, and stir over the fire until the sugar is dissolved; then boil rapidly for twenty minutes, or until it forms a thick, clear syrup. Try frequently, by placing a spoonful in a saucer, and standing it a moment in a cool place.

If it congeals immediately, it is sufficiently done. Fill the lemon rinds with this jelly and stand aside over night to set. Then put them with the open part downwards into glass jars, and pour over the syrup. Tie up as directed.

Limes and oranges may be preserved in the same way.

These are delicious.

### MULBERRIES

4 pounds mulberries      4¾ pounds sugar  
1 quart mulberry-juice

FOR THE JUICE:—Put one pound of mulberries and one gill of water in a porcelain-lined kettle, *simmer* gently until the mulberries are soft, then strain through a fine sieve, pressing through all the juice. To this juice add the sugar, boil, and skim, then add the remaining mulberries, and *simmer* very gently for fifteen minutes; then stand aside over night to cool. In the morning, if the syrup has not jellied, boil again for fifteen minutes, being very careful not to break the mulberries. Put into jars or tumblers, and stand aside to cool. When cold, tie up as directed.

### PEACHES

Select large, juicy, ripe freestone peaches. Pare, cut into halves, and remove the stones. Weigh, and to each pound of peaches allow one pound of sugar

and a half-dozen peach kernels. Put a layer of the peaches in a bowl or jar, then a layer of sugar, then another layer of peaches, then a layer of sugar, and so on until all is used. Cover and stand aside over night. In the morning put the peaches in a porcelain-lined kettle, add the kernels, and bring quickly to a boil; then *simmer* until the peaches are tender and clear. Lift them carefully, one piece at a time, and put into glass jars or tumblers. Stand aside to cool. When cold, pour over the syrup, and tie up as directed.

Apricots and nectarines may be done in precisely the same manner.

### PEARS

Pears may be preserved in precisely the same manner as Peaches.

### PRESERVED PINEAPPLE

Pare and remove the eyes from large, ripe, sound pineapples. Cut them into slices, and with a small cake cutter remove the core. Reserve for preserving only the finest slices. Chop the inferior slices rather fine. Add to each pint one pint of water, and one pint or pound of sugar; bring to a boil and skim. Boil slowly for a half hour and strain. Weigh the perfect slices, and take an equal quantity of sugar, which you must add to the hot syrup.

Bring again to a boil and skim. Add the perfect slices, and stand them aside over night. In the morning add the juice of a lemon, bring slowly to boiling-point, and cook until transparent. Put away in jars.

### GRATED PINEAPPLE

Pare and remove the eyes from perfectly ripe, sound pineapples. Grate them from the outside to the core, rejecting the core. Weigh, and to each pound allow a pound of sugar, mix the two together, let them stand over night. Next morning bring to a boil and skim. *Simmer* gently until the pineapple is transparent and is as thick as marmalade.

### QUINCES

Select large ripe quinces. Wash and wipe them. Pare, core, and cut into slices, or they may be quartered. Throw each piece as finished in water to prevent discoloration. When you have sufficient for the preserving-kettle, put them in and cover with boiling water. *Simmer* gently until tender. When tender, lift carefully with a skimmer and slide on to flat dishes. Continue boiling the quinces in the same water until all are cooked. Put the parings and rough pieces into the same water in which you have cooked the quinces, and *simmer* gently one

hour, keeping closely covered all the time; then strain, and measure, and to every pint of this liquid allow one pound of sugar. Stir over the fire until the sugar is dissolved, bring quickly to a boil, boil rapidly ten minutes, skimming as the scum comes to the surface. Now put in the quinces, and boil until they are clear, tender and red. If you wish them bright colored, keep the kettle closely covered while the quinces are cooking. When done, lift gently into glasses or jars, give the syrup another boil until it jellies, pour it over the quinces, and stand aside to cool. When cold, tie up as directed.

### RASPBERRIES

Put three quarts of large red raspberries into a preserving kettle, mash them, and stand over a moderate fire to heat. At the first boil, remove them from the fire and press through a jelly-bag. Measure, and to every pint allow one pound of sugar. Put the sugar and juice into a porcelain-lined kettle and bring quickly to a boil. Boil rapidly ten minutes, and skim until the scum ceases to rise. Then put in three quarts of whole raspberries. Boil rapidly about five minutes, and then stand aside to cool. When cold, bring again to boiling-point, then lift carefully by spoonfuls, and put into jars or tumblers. When cold, tie up as directed.

**STRAWBERRIES**

Strawberries may be preserved precisely the same as Raspberries.

**WIESBADEN STRAWBERRIES**

Purchase six quarts of good, sound, ordinary strawberries; these need not be large, but must be good. Wash them by putting them into a colander and plunging them up and down in a pan of cold water. Weigh the strawberries, and to each pound allow a pound of sugar. Put a layer of strawberries and a layer of sugar in your preserving kettle, cover the kettle and stand it aside over night. Next morning drain all the juice from the berries, pressing them lightly. Purchase six quarts of the finest berries in the market, wash them if necessary, stem them, and pack them at once into clean glass jars. Boil the strawberry syrup for twenty minutes; test it to see if it is a little jelly-like when cold. Dip this boiling syrup over the berries in the jars, adjusting the rubbers before you fill the jars. Take the tops from boiling water, screw them on the jars, put them down into the boiler, under boiling water, and boil rapidly ten minutes. Stand them, if possible, in the hot sun. As the sun goes down, bring them in, and the next day stand them in the sun again. Put them away in your preserving closet. The strawberries should be solid. They should not come to

the top of the jars, and the syrup should be jelly-like, rather than stringy.

It is wise to use half-pint or pint jars for all fine fruits.

### **WIESBADEN RASPBERRIES**

Purchase four quarts of soft, perfect red raspberries. Weigh them, and allow an equal quantity of sugar. Finish them precisely the same as you did Strawberries in preceding recipe.

### **WIESBADEN WHITE CURRANTS**

Gather the fruit on a dry day, or purchase perfectly ripe bunches of currants. Strip the fruit carefully from the stems, and put the largest currants aside in one bowl. Mash the small currants with a wooden pestle. Strain the juice through an ordinary jelly bag, measure it, and allow to each pint one pint of granulated sugar. Boil the syrup ten minutes, add the sugar, stir until the sugar is dissolved, bring it again to boiling-point and pour it over the large currants that have been put into tumblers. Cover the tumblers with glass and stand them in the sun during the middle of the day for three days, bringing them in always at night.

**BAR-LE-DUC**

Purchase large white currants. Wash them before you remove them from the stems, then remove them carefully from the stems, put a layer in the bottom of your preserving kettle and pour over sufficient boiling strained honey to cover. Let these stand for twenty-four hours. Next morning, with a skimmer lift the currants carefully, put them into small tumblers. Boil the syrup until it is thick, about ten minutes. Fill the tumblers, cover with paraffin and paper. Red currants may be used in the place of white.

**TOMATOES (Green)**

Select one peck of green, smooth tomatoes. Wash, and then cover with boiling water, let stand thirty minutes, wipe, and cut into slices. Slice also six large juicy lemons, and carefully remove the seeds. Put the tomatoes in a porcelain-lined kettle, add the lemons, six pounds of sugar, and an even tablespoonful of ground ginger or a small piece of ginger-root sliced, add a half-pint of water to prevent burning, cover the kettle, and *simmer* gently for one and a half hours, skimming carefully. Then stand aside to cool. When cold, bring again to boiling-point, and *simmer* gently another hour. Then put into small jars or tumblers, and stand aside to cool. When cold, tie up as directed.

**TOMATOES (Ripe)**

Select a half-peck of fine, smooth tomatoes, not over-ripe. Scald, peel, and weigh them, and to each pound of tomatoes allow one pound of sugar, the juice and rind of half a lemon, a small piece of ginger root cut into slices. Put all together in a porcelain-lined kettle, and *simmer* gently for three hours, then put carefully into tumblers or jars, and stand away to cool. When cold, tie up as directed.

**TOMATOES (Yellow)**

The small yellow tomatoes, with an equal quantity of grated pineapple and preserved according to the preceding recipe, omitting the lemon and ginger, make most delightful preserves.

## MARMALADES OR JAMS

### BARBERRY JAM

Pick three pounds of barberries from the stalk, put them in a jar or farina-boiler, with three pounds of sugar. Stand the jar in a saucepan of boiling water, and *simmer* gently until the sugar is dissolved and the berries soft, then stand aside all night. In the morning put them in a porcelain-lined kettle, and *simmer* slowly for twenty-five minutes, stirring continually. When done, turn into tumblers, and stand aside to cool. When cold, tie tightly with tissue paper, brushed over the top with the white of an egg.

### BLACKBERRY JAM

Put the blackberries into a porcelain-lined kettle, stand them over a very moderate fire until thoroughly heated, then press them through a sieve. Measure the liquid, and to every pint allow a half-pound of sugar. Put the sugar and liquid back into the kettle, and boil rapidly twenty minutes, stirring occasionally to prevent scorching. Pour into tumblers or jars, and seal the same as fruit jelly.

**RED CURRANT JAM**

Make precisely the same as Barberry Jam, using three-quarters of a pound of sugar to every pound of currants.

Black and white currant jam may be made the same.

**GRAPE JAM**

Pulp the grapes; put the skins in one basin and the pulps in another. Pour the pulps in a porcelain-lined kettle, and bring to boiling-point; then press them through a colander, add the skins, and measure. Finish the same as Blackberry Jam.

Or, after boiling the twenty minutes, the whole may be pressed through a sieve to make it fine.

**GREEN GRAPE JAM**

Make precisely the same as Grape Jam, using three-quarters of a pound of sugar to every pint of grapes.

**RASPBERRY JAM**

Put six quarts of raspberries and one quart of currant juice in a porcelain-lined kettle, add two quarts and a pint of granulated sugar. Mash the fruit with a long wooden spoon, stand over a quick fire, boil, and stir continually forty minutes. Put away as directed for jams.

**RHUBARB JAM**

Wash the young rhubarb and cut into pieces about an inch long. Do not peel it. Weigh, and to each pound allow three-quarters of a pound of sugar. Put all in a porcelain-lined kettle, bring slowly to a boil, then boil and stir continually for three-quarters of an hour. Put into jars or tumblers, and tie as directed.

**GOOSEBERRY JAM**

Select two quarts of ripe, and two quarts of green gooseberries. Top and tail them; put them into a porcelain-lined kettle, with just enough water to prevent scorching. Stir every now and then until the gooseberries are soft, then add half the quantity of sugar, boil twenty minutes and put away in tumblers. This should form quite a thick jelly.

**ORANGE MARMALADE No. 1**

(Miss Anna Collins, Philadelphia)

One dozen of the finest oranges cut into thin slices. Pour on these six quarts of water, and let stand twenty-four hours. Put to boil in same water, and boil three hours. Add seven pounds of white sugar, and boil until clear. Carefully keep out all seeds and cores. Delicious.

**ORANGE MARMALADE No. 2****(Miss Parloa)**

Take equal weights of sour oranges and sugar. Grate the yellow rind from one-fourth of the oranges. Cut all the fruit in halves at what might be called the "equator." Pick out the pulp and free it of seeds. Drain off as much juice as you conveniently can, and put it on to boil with the sugar. Let it come to a boil; skim, and *simmer* for fifteen minutes; then put in the pulp and grated rind, and boil fifteen minutes longer. Put away in jelly tumblers.

**LEMON MARMALADE**

Peel off the thin yellow rind from one dozen lemons; remove the white pith and throw it away. Cut the lemons into halves, remove the seeds and squeeze out the juice, with as much of the pulp as possible. Shave the yellow rind very fine, mix it with the juice and pulp. Cut into halves one dozen large fine oranges, and with a spoon scoop out the pulp. Put aside the rind from two of these oranges, white and yellow together; cut this into strips, put it in a preserving kettle with one quart of cold water, bring to a boil, boil rapidly a half hour and strain. Now add four pounds of sugar, bring the syrup to a boil and skim. Add all the lemon mixture and the pulp of the orange, cook slowly a half hour. Try to see if the mixture

thickens when cold. Put away in tumblers the same as jelly. The syrup should be rather thick before you add the lemon.

### **GRAPE FRUIT MARMALADE**

Purchase one dozen fine oranges, two large grape fruit, two lemons. Wash the oranges and cut them in very thin slices from the outside toward the core, rejecting the core and seeds. Wash the grape fruit and lemons and cut them the same. Put them into a large stone crock or porcelain-lined kettle, and add six quarts of cold water; cover and stand aside over night. Next morning stand the kettle over the fire and boil slowly for two and a half to three hours. Add seven pounds of granulated sugar and boil until transparent. Try every now and then to see if it thickens when cold. This is one of the best of the marmalades.

### **PEACH MARMALADE**

Rub the peaches but do not pare them. Cut them in halves, remove the stones, and to every pound of peaches allow a half-pound of sugar. Put the peaches in a porcelain-lined kettle, add sufficient water to cover the bottom of the kettle; cover, and heat slowly to boiling-point; then stir, and mash the peaches until fine, add the sugar and three or

four kernels (to every quart of marmalade) blanched and pounded to a paste. Boil and stir continually for fifteen minutes, then stand over a more moderate fire, and cook slowly twenty minutes longer. Stir occasionally, that it may not scorch. Put away in stone jars.

Apricot and plum marmalade may be made in the same manner.

#### QUINCE MARMALADE No. 1

Pare, core, and quarter the quinces, saving the parings and cores, rejecting the seeds; cover the parings with cold water, put them in a porcelain-lined kettle, and *simmer* gently thirty minutes. Strain through a fine sieve. Weigh the quinces, and to every pound allow three-quarters of a pound of sugar. Add the sugar to the water in which the parings were boiled, stir until dissolved, add the quinces, and *simmer* gently until tender, about thirty-five minutes. Stir continually, and cook for fifteen minutes longer. Put away in tumblers or small jars.

#### QUINCE MARMALADE No. 2

Pare, core, and slice the quinces, and boil with just enough water to cover them, stirring and mashing the fruit with a wooden spoon until it becomes soft,

When you have reduced all to a smooth paste, stir in a scant three-quarters of a pound of sugar for every pound of fruit. Boil ten minutes more, stirring constantly. Put into small jars or tumblers as directed.

### **APPLE AND QUINCE MARMALADE**

Allow twelve perfect quinces to each peck of apples. Wash and core the apples, but do not pare them. Wash the quinces, cut them into quarters, remove the seeds and slice the quinces; put them, with the apples, into a preserving kettle. Add just enough water to prevent scorching. Watch carefully, and every now and then, if possible, add a little sweet cider; if you cannot get cider, add water from time to time. When the quinces and apples are soft, add a half-pound of sugar to each pound of fruit, stir until the sugar is dissolved, cook twenty minutes. Watch carefully to prevent scorching. Put away in tumblers or jars.

### **CARROT MARMALADE**

Wash and scrape two pounds of full-grown carrots, grate them, add an equal quantity of very ripe peaches or apricots that have been stoned, but not peeled. Weigh, and to each pound allow a half-pound of sugar. Put the fruit in the preserving kettle, stir occasionally until it reaches the boiling

point, cook slowly twenty minutes, add the sugar and the juice of one lemon, boil until transparent and put away in tumblers.

### **PLAIN CARROT MARMALADE**

Grate two pounds of full-grown carrots into one quart of boiling water. Add the juice and grated rind of two lemons, six bitter almonds and twelve sweet almonds, that have been blanched. Cook slowly for one hour, add half the quantity of sugar and cook until jelly-like.

## BUTTERS

### APPLE BUTTER

This should be made from new cider, fresh from the press, and not yet fermented. Fill a porcelain-lined kettle with cider, and boil until reduced one-half. Then boil another kettleful in the same way, and so continue until you have sufficient quantity. To every four gallons of boiled cider, allow a half-bushel of nice juicy apples, pared, cored, and quartered. The cider should be boiled the day before you make the apple butter. Fill a very large kettle with the boiled cider, and add as many apples as can be kept moist. Stir frequently, and when the apples are soft, beat with a wooden stick until they are reduced to a pulp. Cook and stir continuously until the consistency is that of soft marmalade, and the color is a very dark brown. Have boiled cider at hand in case it becomes too thick and apples if too thin. Twenty minutes before you take it from the fire, add ground cinnamon, and nutmeg to taste. It requires no sugar. When cold, put into stone jars and cover closely.

### PEACH BUTTER

Select mellow yellow peaches. Pare and stone. Weigh, and to every pound allow three-quarters of a pound of sugar. Put the peaches in a porcelain-

lined kettle, heat slowly. Mash and stir the peaches until perfectly smooth, then press through a fine sieve, add the sugar, and boil for fifteen minutes, stirring constantly. Put into small jars, and tie up as directed.

Plum and pear butter may be made in the same manner.

### **TOMATO BUTTER**

Scald twenty pounds of ripe tomatoes and remove the skins, put them in a porcelain-lined kettle with four pounds of apples pared, cored, and quartered; stand over a moderate fire to cook slowly for one hour, stirring occasionally to prevent sticking, then add eight pounds of sugar, the juice of four lemons, and one tablespoonful of powdered ginger. Cook and stir continually until reduced to the consistency of marmalade. Put in tumblers or jars. When cold, tie up as directed.

## JELLIES

Jelly making may be divided into two classes—the one kind from fruit rich in pectin, the other from fruit juices thickened with animal or vegetable gelatin. Vegetable gelatins are largely purified sea weeds.

In the first group we have guavas, crab apples, quinces, Japanese quinces, lady blush apples, pippins, red and black currants, cranberries and unripe blackberries heading the list.

It is an easy task to make jelly if the fruit is just ripe, not over ripe, and you select the fruits that I have mentioned. Bananas are so rich in pectin that they will form a jelly without sugar, while oranges and lemons contain so much free acid and so little pectin that the juices cannot be made into jelly unless artificial thickening is used. This is also true of cherries and pineapples. Grapes, plums and strawberries may be made into jelly, providing the housewife understands the chemical conditions of her fruit. It is never necessary to pare fruits for jelly making; the cores and seeds, however, in all cases must be removed.

Large fruit should be cut into strips. Small fruits may be washed and heated, or mashed before they are strained.

For large fruits, allow one quart of water for each four pounds of fruit.

Use a flannel pointed bag for straining.

Do not press the juice through the bag. Allow it to drip or drain.

If possible, put the jelly into tumblers and cool it under glass, away from the dust of the air. An old window sash, put on four feet, raised three or four inches above the jelly, will answer the purpose very well. The spores of mold are constantly floating in the air; they are apt to fall directly on the jelly, and when the jelly is covered with paraffin, or sealed, they begin to grow, and spoil the whole mixture.

Cover your jelly tumblers with two thicknesses of tissue paper, paste it down on the tumblers with photographer's paste, or the white of an egg. When dry, brush the top of the paper with water, to which you have added a teaspoonful of formaldehyde to each quart. This paper will dry, and in the drying shrink, and will form almost a bladder-like covering for the tumbler.

Keep jelly in a perfectly clean, light closet. Dark, damp closets are conducive to mold.

**APPLE JELLY**

Lady blush or fall pippins are best for jelly. The first make a bright-red jelly, and the latter an almost white jelly.

Wipe the fruit, cut it into pieces without paring or removing the seeds. Put into a porcelain-lined kettle and barely cover with cold water; cover the kettle, and boil slowly until the apples are very tender; then drain them through a flannel jelly-bag—do not squeeze, or the jelly will be cloudy. To every pint of this juice allow one pound of granulated sugar. Put the juice into a porcelain-lined kettle, and bring it quickly to a boil; add the sugar, stir until the sugar is dissolved, then boil rapidly and continuously until it jellies, skimming the scum as it comes to the surface; twenty minutes is usually sufficient, but sometimes I have boiled it thirty-five minutes before it would jelly properly. It is wise to commence testing after fifteen minutes' boiling. To do this, take out one teaspoonful of the boiling jelly, pour it into the bottom of a saucer, and stand it in a cold place for a moment; then scrape it one side with a spoon—if jellied, the surface will be partly solid; if not, boil a few minutes longer, and try again. As soon as it jellies, roll the tumblers quickly in boiling water, then fill them with the boiling liquid. Stand aside until cold and firm (about twenty-four hours). Then, if you have jelly-tumblers, put on the lids; if not, cover with

two thicknesses of tissue paper, and paste the edges of the paper down over the edge of the tumbler. Then moisten the top of the paper with a sponge dipped in cold water. This moistening stretches the paper, so that when it dries again it shrinks and forms a covering as tight and smooth as bladder skin. I do not recommend jelly being covered with brandied paper, as in my hands it has never been satisfactory. The jelly, in cooling, forms its own air-proof covering, and if the top of the tumbler be well secured, it is all that is necessary. Keep in a cool, dry place.

#### **CRAB APPLE JELLY**

Cut the large Siberian crab apples into halves, and then into quarters, and to every five pounds of apples allow one quart of water. Proceed and finish precisely the same as for Apple Jelly.

#### **BLACKBERRY JELLY**

The uncultivated blackberries are best for jelly, and should be rather under- than over-ripe. Put the berries into a stone jar, stand it in a kettle of cold water, cover the top of the jar, and heat slowly until the berries are soft. Now put a small quantity at a time into your jelly-bag, and squeeze out all the juice. Measure the juice, and to each pint allow one pound of granulated sugar. Turn the juice into

a porcelain-lined kettle, and stand over a brisk fire. Put the sugar into earthen dishes and stand in the oven to heat. Boil the juice rapidly and continuously for twenty minutes, then turn in the sugar hastily, stirring all the while until the sugar is dissolved. Dip your tumblers quickly into hot water, watch the liquid carefully, and as soon as it comes again to a boil, take it from the fire and fill the tumblers.

If the fruit is over-ripe your jelly will never be firm, no matter how long you boil it.

Follow these directions carefully and you will never fail.

This recipe may also be used for elderberry jelly.

### CHERRY JELLY

For cherry jelly, use the pie or morello cherry, and proceed the same as for Blackberry Jelly.

### CRANBERRY JELLY

1 quart of cranberries      1 pound of sugar  
½ pint of water

Wash the cranberries, and put them on with the water to boil for ten minutes, then mash and squeeze through a flannel bag. Return the juice to the kettle, add the sugar, boil rapidly and continuously for about fifteen minutes, or until it jellies, and turn out to cool.

**CURRANT JELLY**

Select currants that have been freshly picked and are not too ripe. If they are sandy, wash them, but do not stem. Mash a small quantity at a time in a stone jar, with a potato-masher, squeeze through a flannel bag, then strain again without squeezing, that the liquid may be *perfectly* clear. Turn the liquid into a porcelain-lined kettle, stand over a brisk fire. Put the sugar into earthen basins, and then in the oven to heat. Boil the juice twenty minutes after it begins to boil, then stir in hastily the hot sugar, and continue stirring until the sugar is dissolved, no longer. Skim thoroughly, bring it quickly to a boil again, and boil two minutes. Dip the tumblers into hot water, fill them with the boiling liquid, and stand away for twenty-four hours to jelly. If it is not then sufficiently jellied, cover the tumblers with common window-glass and stand in the sun several days. Then cover with tissue paper as directed for Apple Jelly.

**DAMSON JELLY**

Make precisely the same as Blackberry Jelly.

### GRAPE JELLY

For this use ripe Concord, Isabella, or Clinton grapes. They should be freshly picked, and with the bloom on.

Make precisely the same as Blackberry Jelly.

### GREEN GRAPE JELLY

Fox grapes are the best for this. Stem the grapes, put them in a porcelain-lined kettle, barely cover with cold water, and finish the same as Apple Jelly.

### PEACH JELLY

Pare, stone, and slice the peaches, put them into a stone jar, and to each half-peck of peaches, allow one cup of water. Crack a dozen of the kernels and throw them in with the peaches. Stand the jar in a kettle of boiling water, cover closely, and boil for one hour, stirring until the fruit is well broken, then turn into a flannel jelly-bag, and hang up to drip. To every pound of this juice allow one pound of granulated sugar. Finish the same as Apple Jelly.

### PEAR JELLY

Make precisely the same as Apple Jelly, using the juice of one lemon to every pint of pear-juice. This is one of the most difficult of all jellies to make.

**PLUM JELLY**

For this use common blue plums. Wash them in cold water, put in a porcelain-lined kettle, and to every half-peck allow a pint of water; cover the kettle, and heat the plums until soft and tender, then turn into a flannel jelly-bag, and drip slowly until the pulp is dry. Do not squeeze or handle the bag, or the jelly will be cloudy. Finish the same as Apple Jelly.

**QUINCE JELLY**

Wipe the fruit, cut it in halves, then in quarters, remove the seeds, but do not pare. Now cut the quinces into thin slices, and finish the same as Apple Jelly.

The better way is to use the nice pieces for canning or preserving, and save the parings and knotty pieces for jelly, always rejecting the seeds, as they prevent the jelly from being clear and firm.

**RASPBERRY JELLY**

Make precisely the same as Blackberry Jelly.

**RHUBARB JELLY**

Wash and wipe the stalks, and, without paring, cut into pieces about one inch long, put into a porcelain-lined kettle, allowing one pint of water to every four pounds of rhubarb. Boil to a soft pulp, turn into a

jelly-bag, and hang up to drip; do not squeeze or press. To every pint of this juice allow one pound of sugar. Boil and finish the same as Apple Jelly.

### STRAWBERRY JELLY

Make precisely the same as Blackberry Jelly.

### TUTTI FRUTTI JELLY

Take equal quantities of ripe morello cherries, red raspberries, currants and strawberries. Stone the cherries, saving all the juice that escapes. Mix all the fruit together, heat, and squeeze through a jelly bag. Empty the pulp from the bag, wash the bag through several waters, then turn the juice into it and drip slowly without pressure. When all has dripped, measure the juice, and to every pint allow one pound of granulated sugar. Turn the juice into a porcelain-lined kettle, and bring quickly to a boil, and then boil rapidly for ten minutes. While this is boiling, stand the sugar in earthen pans in the oven to heat, turn it while hot into the boiling juice, stir until the sugar is dissolved, then boil rapidly again until it jellies, about ten minutes longer. Try by dipping a little in a saucer and standing it in a cool place. If the surface congeals quickly it is done. Turn while hot into jelly-tumblers, and stand aside to cool. Tie up as directed.

**MINT JELLY**

Wash four quarts of green grapes, put them into a preserving kettle with one quart of water, bring to a boil, stir and boil twenty minutes. Mash the grapes through a colander. Turn this pulp into a jelly-bag and let it drain over night. Next morning measure the liquid, and to each pint allow a pound of sugar. Put the liquid into the preserving kettle, bring it to boiling-point and skim. Boil ten minutes, add the sugar and boil until it forms a jelly when cool. Try a little at a time in a saucer on the ice. Take from the fire, add ten drops of oil of spearmint and sufficient vegetable green coloring to make it a light green shade. Turn this at once into tumblers, cool and put away the same as other jelly.

**QUICK MINT JELLY**

Cover a half box of gelatin with a half cupful of cold water, to soak for a half-hour. Add the juice of three lemons, one cupful of sugar and three cupfuls of boiling water; stir until the gelatin is dissolved. Beat the whites of two eggs with two tablespoonfuls of cold water, beat them into the jelly, bring this to boiling-point, boil five minutes and strain through flannel. Flavor with oil of mint or mint extract, color, and if you like, put a few mint leaves through the jelly. Turn into small molds

to harden. Spearmint, not peppermint, must be used for all mint jellies.

### BRANDY PEACHES

Take large white or yellow freestone peaches. (They must not be too ripe.) Scald them with boiling water; cover, and let stand until the water becomes cold. Repeat this scalding, then take them out, lay them on a soft cloth, cover them over with another cloth, and let them remain until perfectly dry. Now put them in stone jars, and cover with brandy. Tie paper over the tops of the jars, and let them remain in this way one week. Then make a syrup, allowing one pound of granulated sugar and a half-pint of water to each pound of peaches. Boil, and skim the syrup, put in the peaches, and *simmer* until tender; take the peaches out, drain, and put them in glass jars. Stand the syrup aside to cool. When cold, mix equal quantities of this syrup and the brandy in which you had the peaches. Pour this over the peaches, and seal.

### DRIED FRUITS

Fruits for drying should be perfect and quite ripe. If peaches, cut in halves, and take out the stones. It is best not to pare them, but the fur should be thoroughly rubbed with a piece of flannel. Spread

them in a single layer on boards, and stand in the hot sun to dry gradually until they turn leather-color, bringing in always before sunset, and never put them out in cloudy or damp weather. A piece of mosquito netting will prevent the flies from reaching them. When dry, put into paper sacks, and hang in a dry, cool place.

Apples are dried in the same manner, except they must be pared and cut into slices. Pears and quinces the same.

Plums may be dried the same as peaches.

Cherries should be stoned before drying.

All fruits may be dried in the oven, providing the oven is not sufficiently hot to scorch or scald the fruits. This is an excellent way, as the fruit is dried more quickly, and you escape the danger of its being stung by insects.

### CONSERVED FRUITS

Make a syrup from a pound of sugar, and a half-pint of water; stir until the sugar is dissolved, then boil quickly about three or four minutes. Try by dipping a little in cold water; if it forms a small ball when rolled between the thumb and finger, it has attained the desired degree, known as the "ball." Throw the fruit to be conserved a little at a time into this syrup, let it *simmer* for a moment, lift with a skimmer, draining free from all syrup. Sprinkle

sugar thickly over boards or tin pans, place the fruit over it in a single layer, sprinkle over thickly with granulated sugar and place in the oven or sun to dry. When dry, make a syrup as before, and just before it reaches the "ball" degree add the fruit, stir with a wooden spoon until it begins to grain and sticks to the fruit. When cold, sift off the sugar and put out again to dry. When dry, place in boxes in layers between sheets of waxed paper. Keep in a cool, dry place.

#### ORANGE AND LEMON-PEEL

Take six Florida oranges or the same number of lemons, and take off the peel in quarters, throw into salt water for twenty-four hours, then drain, and throw into clear boiling water, and boil slowly for one hour. Drain. Make a syrup from one pound of sugar and one pint of water; boil and skim it. Put in the lemons, bring to boiling-point, then stand away for twenty-four hours. Then drain the syrup from the peels, and spread them on a large dish, stand in the sun or oven for a few hours to partly dry. Then boil the syrup again for fifteen minutes, add the peels and stand away again over night. Repeat this process every day until you find the peels are clear and the syrup has penetrated them thoroughly. Then drain, sift thickly with granulated sugar, and stand in the sun or oven to dry. Keep in boxes between layers of waxed paper.

**ORANGE PRAWLINGS**

Take the peel from six Havana oranges, cut off the entire white part, leaving only the rind, which cut into small pieces about the size of a straw. Put one pound of sugar and a half-pint of water in a porcelain-lined kettle to boil. When it reaches the fifth degree, this may be ascertained by dipping a small skimmer into the syrup, shaking it over the kettle, then blowing through the holes; if small air bubbles are seen on the other side, it is just right. Throw in the orange peelings and let them boil about one minute, take them from the fire, and stir with a wooden spoon until the sugar grains and hangs about them. Sift off the loose sugar, and when cold separate them. Keep between layers of waxed papers, in boxes.

These are nice for mince pies or puddings.

**TOMATO FIGS**

Allow to six pounds of tomatoes, three pounds of granulated sugar. Select those that are quite ripe, small, and smooth. Scald and remove the skins. Place a layer of the tomatoes in the bottom of a porcelain-lined kettle, strew them thickly with the sugar, and place them over a moderate fire. Stew very gently until the sugar appears to have thoroughly penetrated the tomatoes. Lift them carefully one at a time with a spoon, spread them on

dishes, and dry in the sun, sprinkling with granulated sugar several times while drying. When perfectly dry, pack in jars with a layer of sugar between each layer of tomatoes. Care must be taken not to let rain or dew fall on them while drying.

### CHERRIES

Select large sound morello cherries; stone them with either a button hook or a thin hairpin, keeping the cherries perfectly whole. Weigh the cherries, and to each pound allow a pound of sugar. Put a layer of cherries and a layer of sugar in your preserving kettle; stand them aside over night. Next morning drain the syrup from the cherries, bring to boiling-point and skim. Add a few cherries at a time, let them cook until transparent, lifting each lot with a skimmer, spreading them on a large stoneware platter. Stand this platter in the sun, or the oven, and when the cherries are partly dry, roll them in granulated sugar and put them between layers of waxed paper.

Pineapple, thin shavings of Quinces, Pears and fresh Figs may be done after the same recipe.

### PEAR HONEY

Select one dozen Bartlett pears. Pare, cut into halves, remove the core, and grate the pears at once into a quart of water. Boil gently for a half-hour,

then add two pounds of sugar. Cook until transparent and the thickness of good honey. Add the juice of two lemons, and put at once into pint or half-pint jars.

### QUINCE HONEY

5 nice quinces, pared and grated  
1 pint of water      3 pounds of granulated sugar

Stir the grated quinces into the boiling sugar and water. Cook fifteen minutes, pour into glasses, and let cool before covering.

## **SYRUPS**

These are made from the juices of fruit with sufficient quantity of sugar for their preservation, and retaining them in their liquid state. Cooling, delicious drinks, puddings, ice creams, and water ices may be made from them when the fruits themselves are out of season.

### **CURRENT SYRUP**

Mash the currants and stand aside in a warm place for four days. Cover to keep out dust and insects. Then turn into a jelly-bag and let drip slowly. If you wish it very clear, filter through filtering-paper. Measure the juice, and to every pint allow two pounds of granulated sugar. Mix the juice and sugar together until only a small portion settles to the bottom, then pour it into a farina-boiler, place over the fire, and the heat of the water as it boils around will dissolve the sugar. When this has been thoroughly effected, take it from the fire and stand aside to cool. When cold, put into small bottles, fill them to the neck, cork tightly, seal, and keep in a cool, dry place. Be very careful that you use only

porcelain or granite articles in the making of syrups, as the acids of the fruits will act upon metal and change the bright-red color to a purple. Use a wooden spoon in stirring. Strong heat or boiling also destroys the color and flavor of the syrups.

Cherry and grape syrups may be made in the same manner.

### LEMON SYRUP

This syrup may be made in the spring when lemons are plentiful and cheap. It is best to buy them by the box as the syrup will keep the entire year. Wipe the lemons with a damp cloth and roll hard under your hand to soften them. Cut in halves and squeeze every particle of juice from them. If the yellow rind or zest of the lemon is liked, they may be rolled in a portion of the sugar. To every quart of juice allow six pounds of granulated sugar. Put the sugar in a large porcelain-lined kettle. Beat the whites of two eggs to a stiff froth, mix gradually with them one quart of clear water, and then add the whole to the sugar. Stir until the sugar is dissolved, then place the kettle over the fire, and boil and skim until the scum ceases to rise. Strain the lemon-juice, add it to the boiling syrup, cover, and boil ten minutes. Stand aside to cool. When cold fill into clean bottles that have been rinsed well with alcohol, cork tightly and seal.

### ORANGE SYRUP

Make precisely the same as Lemon Syrup, allowing six pounds of sugar to every two quarts of orange-juice.

### PINEAPPLE SYRUP

Put three pounds of sugar in a porcelain-lined kettle. Beat the white of one egg to a froth, add to it gradually one pint of clear cold water, add this to the sugar, stand it over the fire, and boil and skim until perfectly clear. Stand aside to cool. Pare and grate sufficient pineapples to make three pints of juice, which must be strained carefully through a flannel bag. Boil the syrup again for ten minutes, then add gradually the pineapple-juice, let it come again to a boil, skim, and stand aside to cool. When cold, bottle, cork, and seal.

### RASPBERRY SYRUP

Mash the berries and stand in a warm place for two or three days, or until fermentation has commenced. If this was omitted the syrup would jelly instead of remaining liquid. To every pint of juice allow two pounds of sugar. Finish precisely the same as Currant Syrup.

Blackberry syrup may be made precisely the same.

**ROSE SYRUP**

1 pound of rose leaves      1 quart of clear water  
4 pounds of granulated sugar

Put the water in a porcelain-lined kettle, bring to boiling-point, add the leaves, take from the fire, cover, and stand over night. Then strain through a fine cloth, add the sugar, place in a farina-boiler, and boil until the sugar is thoroughly dissolved. Stand aside to cool, and bottle.

Violet syrup may be made in the same way; first freeing the flowers from stalks and calyx.

**STRAWBERRY SYRUP**

Put two pounds of sugar and a pint of water in a porcelain-lined kettle, stir until the sugar is dissolved, boil, and skim. Stand aside to cool. Mash fresh ripe berries and strain them through a bag. Bring the syrup to boiling-point and boil rapidly until, when dropped in cold water and rubbed between the thumb and finger, it forms the small "ball." Now add to this a quart and half-pint of strawberry-juice, let it come to a boil, skim, bottle and seal.

**RASPBERRY VINEGAR**

Put two quarts of raspberries into a stone jar, and pour over them one quart of good cider vinegar. Cover and stand aside for two days, then drain off

the liquid without mashing the berries, pour it over a quart of fresh fruit, and stand as before. Do this once more, the last time straining through a muslin bag. Now add one pound of sugar to every pint of this liquid. Boil slowly five minutes, skim, let stand fifteen minutes, bottle, and seal.

Strawberry and blackberry vinegars are made in precisely the same manner.

### GRAPE JUICE

Wash the grapes thoroughly, pick them quickly from the stems, put them into a porcelain kettle with just enough water to prevent scorching. Stir until they reach the boiling-point. Mash the grapes and drain them in an unbleached muslin or drill bag over night. Next morning put the juice into a porcelain-lined kettle, bring to boiling-point, skim, and boil ten to fifteen minutes. Have ready perfectly clean bottles and sterile corks, and a wash boiler partly filled with hot water. Fill the bottles, cork them, put them down on their sides in this boiler of hot water. When you have the last bottle in, cover the boiler and boil continuously one hour. Lift the rack and the bottles, dip the corks, while hot, into sealing wax, and keep in a light, dry closet.

**GRAPE JUICE No. 2**

Cook the grapes and drain over night, as directed in preceding recipe. Bring the grape juice to boiling-point, skim, and boil twenty minutes. Fill this into two quart glass jars, dip the rubbers into boiling water and scald the tops. Adjust the rubbers and screw on the tops as you would for canning fruit. Stand the grape juice aside in a light, dry closet. In two months open the jars of grape juice, fill it into bottles, leaving at least two inches at the neck; put the corks loosely on the bottles and stand them in a boiler of cold water; the water must not be sufficiently deep to boil over the bottles. Bring to boiling-point, boil one hour, then drive in the corks and dip them at once into sealing wax. This method is said to produce a better flavor in the grape juice.

Currant juice, raspberries and currants, raspberries alone, and strawberries may be made following the first recipe for grape juice. These juices are very nice for the flavoring of pudding sauces, fruit punches and ice creams.

# PICKLING

## SWEET PICKLES

Sweet pickles may be made from all fruits that can be preserved, including citron, watermelon-rind, and cucumbers. The syrup should be rich and sufficiently cooked to keep without being hermetically sealed. Smooth-skinned fruits should be well pricked before cooking.

## SPICED PEACHES

7 pounds of peaches	1 teaspoonful of ground cloves
4 pounds of sugar	2 teaspoonfuls of allspice
1 pint of vinegar	2 teaspoonfuls of cinnamon
½ ounce of ginger-root	½ teaspoonful of ground mace

Pare the peaches, but do not remove the stones. Put the vinegar and sugar on to boil. Mix the spices and divide them into four parts. Put each into a small square of muslin, tie tightly, and then throw them into the sugar and vinegar. When this mixture is hot, add the peaches; bring all to boiling-point, take from the fire, and turn carefully into a stone jar.

Stand in a cool place over night. Next day, drain all the liquor from the peaches into a porcelain-lined kettle, stand it over a moderate fire, and, when boiling hot, pour it back in the jar over the peaches. Next day, drain and heat again as before, and do this for nine consecutive days; the last time boil the liquor down until there is just enough to cover the fruit. Add the fruit to it, bring the whole to a boil, and put in jars or tumblers for keeping.

The following fruits may be pickled or spiced in the same manner: Apples, Cantaloupes, Cherries, Pears, Plums, Quinces, Watermelon-rind.

### **SWEET CUCUMBER PICKLES**

Wash and wipe one hundred small cucumbers and place them in stone jars. Add sufficient salt to boiling water to make a brine that will bear an egg; pour this over the pickles and stand aside for twenty-four hours. Take each pickle carefully in your hand and dry it on a piece of cheese cloth, and pack it at once into clean glass jars. To each seven pounds of pickles allow four pounds of sugar, a quart of vinegar, one teaspoonful of ground allspice, a half-teaspoonful of ground cloves, the same of cinnamon, the same of curry powder, a saltspoonful of mace, and a saltspoonful of black pepper. Mix the spices and tie them loosely into two or three

squares of cheese cloth. Put these, with the sugar and vinegar, over the fire in a porcelain-lined kettle, bring to boiling-point, skim, and fill each jar to overflowing with the boiling vinegar. Dip the rubbers from a kettle of hot water, adjust them; scald the lids and fasten the jars as you would for canned fruit. The pickles will be ready for use in two or three weeks.

## SOUR PICKLES

For these, use none but the best *cider* vinegar. Do not boil it, as in this way it is weakened; bring it only to scalding-point before pouring it over the pickles.

Always prepare pickles in porcelain-lined or granite kettles; use wooden spoons, never metal. Spice carefully, so that one flavor will not predominate, but will all combine to make a pleasant whole. Cucumbers and other pickles are often so strongly flavored with onion, spices, etc., that the original flavor is entirely lost.

Pickles should be kept in a dry place in stone or glass jars.

Nasturtiums or a small piece of horseradish thrown in each jar prevents the vinegar from molding.

As pickles of all kinds are indigestible, eat sparingly and masticate thoroughly.

## JERUSALEM ARTICHOKEs

Wash and scrape the artichokes, throw them in cold water for two hours, drain, cover with fresh boiling water, and boil until tender, about twenty minutes. Drain, and put them into glass or stone jars. To every quart of artichokes allow one pint of cider

vinegar, one bay leaf, one slice of onion, four whole cloves, and a blade of mace. Put the vinegar in a porcelain-lined kettle with all the other ingredients, stand it over a moderate fire, and bring slowly to boiling-point, then pour it over the artichokes, and stand away to cool.

They will be ready to use in twenty-four hours, and will keep two weeks.

### PICKLED BEANS

String a quarter of a peck of tender green beans, throw them into a kettle of boiling water, add a teaspoonful of salt, and boil twenty-five minutes. When done, drain in a colander, let stand until cold; then put into glass or stone jars, sprinkle lightly with cayenne, add a tablespoonful of whole mustard, a tablespoonful of chopped horseradish, and cover the whole with good strong cider vinegar.

### BORDEAUX SAUCE

(Mrs. Henry Addis)

1 gallon of chopped green tomatoes	1 ounce of cloves
2 gallons of chopped cabbage	1 ounce of turmeric
1 ounce of black pepper	1 ounce of ginger
$\frac{3}{4}$ pound of brown sugar	1 ounce of celery-seed
$\frac{1}{4}$ pound of mustard-seed	1 gill of salt
	1 gallon of vinegar

Mix the cloves, ginger, turmeric, pepper, celery-seed, mustard-seed, sugar and salt together, then

add the vinegar; pour this over the cabbage and tomatoes, turn into a porcelain-lined kettle, and *simmer* gently twenty minutes. Put away in glass or stone jars.

### PICKLED CABBAGE

Chop sufficient cabbage to make one gallon, add to it two good-sized onions chopped fine, two red and two green peppers cut into small strips. Put a layer of this in the bottom of a stone jar, sprinkle with a tablespoonful of salt, then another layer of cabbage, and another spoonful of salt, and so on until all the cabbage is used; cover and stand away over night. Next day take it out and press thoroughly in a colander. Put a layer of cabbage in the bottom of the jar, sprinkle over a few mustard-seeds and one or two whole cloves, then another layer of cabbage and mustard-seed, and so on until all the cabbage is in. Do not pack tightly. Cover with good cider vinegar, wait until the vinegar soaks to the bottom of the jar, cover again, and so continue until the cabbage is thoroughly moistened with vinegar, and it is ready for immediate use.

Red cabbage may be pickled in the same way, leaving out the peppers.

## CELERY PICKLE

Select a very solid white head of cabbage and chop sufficient to make two quarts, and cut into small pieces the same amount of white celery. Put both in a porcelain-lined kettle, add two tablespoonfuls of salt, a quarter of a pound of white sugar, a quarter of a pound of white mustard-seed, a half-ounce of ginger-root, or powdered ginger, and two quarts of good cider vinegar. Stand over a slow fire to *simmer* until cabbage is tender, about a half hour. When cold, put into stone or glass for keeping.

## CHOW CHOW

$\frac{1}{2}$ pound of English mustard	$\frac{1}{2}$ gallon of vinegar
$\frac{1}{2}$ ounce of turmeric	1 cup of sugar
2 tablespoonfuls of mustard-seed	1 quart of string beans
1 quart of tiny cucumbers	1 gill of salad oil
1 quart of button onions	1 head of cauliflower

Boil the cauliflower, beans and onions separately until tender. Cover the cucumbers with strong salt water, and soak twenty-four hours. Then mix altogether. Put the vinegar in a porcelain-lined kettle. Mix the mustard and turmeric together, and moisten them with a little cold vinegar, then stir them into the hot vinegar and stir continuously until it begins to thicken; then add the sugar, mustard-seed, and oil, stir again, and pour this, while hot,

over the vegetables. Put away in glass or stone jars.

Cauliflower may be pickled in precisely the same manner.

### **SMALL CUCUMBER PICKLES**

Wash and wipe one hundred small cucumbers, and place them in jars. Cover them with boiling brine, strong enough to bear an egg; let stand twenty-four hours. Then take them out, wipe, place in clean jars, and cover with hot vinegar spiced with an onion, twelve whole cloves, one ounce of mustard-seed, and three blades of mace. They will be ready to use in two weeks.

### **LEMON PICKLE**

For this, choose small fruit with a thick rind. Rub the rind well with a piece of flannel; then slit them down the quarters, but not quite through the pulp, fill these slits with salt and press them together. Stand the lemons upright in an earthen dish for four days; by this time they will be partly covered with brine. Turn them every day for three days longer in this brine. Drain. Add to this brine sufficient cider vinegar to cover the lemons, add one Jamaica pepper, and one ounce of green ginger-root cut into small pieces, bring to boiling-point, skim,

and then stand aside to cool. When cold, pour it over the lemons and put away in glass jars.

### MELON MANGOES

Select small green watermelons or muskmelons. Remove a piece about an inch wide the whole length of the melon; from this opening remove the seeds with a spoon, and scoop out the soft portion in the center. Place this melon with the piece taken from it by its side in a tub, and so continue until you have the desired quantity. Make a brine of salt and clear cold water, sufficiently strong to bear an egg; pour this over the melons, cover, and stand away for twenty-four hours. Drain, keeping each piece carefully with its own melon.

Make a filling as follows: to every dozen melons allow two hard heads of cabbage chopped fine, add to it, six white onions chopped, a pint of nasturtiums, a teaspoonful of ground cinnamon, a teaspoonful of ground cloves, a tablespoonful of chopped horseradish, a half-teaspoonful of black pepper, a tablespoonful of salt, and mix all well together. Fill this into the melons, press down firmly, put in the piece and tie with twine. When all are thus prepared, place them in a stone jar, cover with vinegar, and stand aside twenty-four hours, then place them in a porcelain-lined kettle, and *simmer* gently a half-hour, then place them back

Cucumber mangoes are made in precisely the same manner.

Select large, freestone peaches. Put them in a stone jar and cover them with brine sufficiently strong to bear an egg, and let stand forty-eight hours, then take them from the brine and throw them into cold water for twenty minutes. Wipe each one carefully without breaking the skin, and with a sharp silver knife remove a small piece from one side and extract the stone. Sprinkle the inside lightly with celery seed. Have ready sufficient grated horse-radish, moistened with vinegar, to fill the peaches. As each peach is filled replace the small piece taken from the side and sew it all around with strong white thread. Stand them in stone or glass jars, as closely together as possible. To every five dozen peaches allow

1 gallon of vinegar      1 pound of brown sugar  
¼ teaspoonful of cayenne

Put the vinegar, sugar and cayenne into a porcelain-lined kettle, bring quickly to a boil, and immediately take off. Pour boiling hot over the peaches. When cold, tie up. They will be ready for use in ten days, and are very good.

### PEPPER MANGOES

Cut the tops from one dozen red and one dozen green peppers. Remove the seeds and save the tops. Stand the peppers upright in a tub; put a teaspoonful of salt in each one, cover with cold water, and soak twenty-four hours. Drain. Cut two large heads of cabbage on a cabbage cutter, add to this one teaspoonful of ground cloves, one teaspoonful of ground allspice, four tablespoonfuls of whole mustard and two tablespoonfuls of salt; mix thoroughly. Stuff the peppers with this mixture. Put on the tops and tie tightly. Stand them upright in stone jars, and cover with cold vinegar.

### TOMATO MANGOES

Select smooth, medium-sized green tomatoes. Cut from the top or stem end a piece sufficiently large to allow the removal of the seeds without breaking the tomato. Stand them upright in a tub, with each top by the side of its corresponding tomato, and finish precisely the same as Pepper Mangoes. The

flavor of tomato mangoes is improved by placing here and there in the jar a pepper mango.

### PICKLED MARTINES

Take a quarter-peck of young martines, sufficiently tender to puncture easily with a pin. Wash them in cold water, and then place them in a tub. Make a brine sufficiently strong to bear an egg, pour over the martines, cover, and stand aside for three days, then drain, and cover with cold water; stand twenty-four hours. Drain and wipe dry, put them into a porcelain-lined kettle, cover with good cider vinegar, add a tablespoonful of whole allspice, the same of whole cloves, three bay leaves, and a dozen pepper-corns. Bring the whole quickly to a boil, and boil one minute. Stand aside to cool. When cold, put into jars and tie up. In eight weeks they are ready for use, and are generally a favorite pickle.

### MIXED PICKLES

$\frac{1}{2}$ medium-sized head of cabbage	4 large roots of celery
1 large or two small Spanish onions	6 large green tomatoes
$\frac{1}{4}$ teaspoonful of powdered alum	$1\frac{1}{2}$ quarts of vinegar
4 tablespoonfuls of grated horse-radish	

Chop all the vegetables and mix them together. Put a layer about two inches thick in the bottom of a jar, sprinkle it with a tablespoonful of salt, then another layer of vegetables and salt, and so on until

all is used. Let stand twenty-four hours, then drain, and press out all the liquor; cover with boiling water, let stand again ten minutes, then press with your hands until perfectly dry. Now put a layer (two inches thick) of the pickles in the bottom of the jar, then sprinkle with mustard-seed, black pepper, and the grated horseradish; now another layer of pickles, and so on until all is used. Pour over one quart of vinegar, let stand two days, and it is ready to use.

### PICKLED NASTURTIUMS

Pick the green seeds (after the flower has dropped off) with stems about one and a half inches long, lay them in moderately salted cold water for forty-eight hours. Then lay them in fresh cold water twenty-four hours, drain, pack in bottles or jars and cover with boiling vinegar. Tie up, and stand away at least four weeks before you use them. These may be used as a substitute for capers.

### MOCK OLIVES

¼ peck of green plums	1 ounce of white mustard-seed
2 quarts of cider vinegar	2 heaping tablespoonfuls of salt

Add the mustard and salt to the vinegar, pour into a porcelain-lined kettle, and bring quickly to boiling-point, pour it while boiling over the green plums,

and stand away over night. In the morning drain off the vinegar, make it again boiling hot and pour it over the plums. When cold, put into bottles and cork tightly.

### PICKLED ONIONS

Pour boiling brine over the small button onions, let them stand twenty-four hours, then drain, and cover with hot vinegar spiced to taste.

### PICKLED PARSLEY

Select perfect curly heads of parsley. Wash thoroughly in salt water, drain, and shake until dry. Put into jars of cold vinegar; to each quart allow a tablespoonful of chopped horseradish. Cover and stand away for use. This is especially nice for garnishing cold meat dishes when parsley is out of season.

### PICKLED PEPPERS

Take half large green, the remaining half red and yellow mixed (sweet peppers). Make a small incision at the side and carefully remove the seeds without breaking the peppers. Make a brine sufficiently strong to float an egg and put the peppers in it, cover, and stand aside for twenty-four hours. Renew the brine and stand away again for twenty-four hours. Now drain, and wash carefully in cold

water. To every two dozen peppers, allow a quart of vinegar and a quart of water, put this in a porcelain-lined kettle, bring to boiling-point, pour over the peppers, and stand aside to cool. When cold, drain, and throw this vinegar and water away. Bring to a boil sufficient good cider vinegar to cover the peppers, pour it over the peppers while boiling hot. When cold, tie up for use. Nice for winter salads.

### PICCALILLI

3 dozen of small cucumbers	6 roots of celery
1 small head of white cabbage	3 red peppers
2 quarts of small string beans	3 green peppers
½ teaspoonful of ground mace	2 heads of cauliflower
½ teaspoonful of ground allspice	2 ounces of mustard-seed
½ teaspoonful of ground ginger	1 clove of garlic
1 teaspoonful of black pepper	Sufficient vinegar to cover

Chop all the vegetables rather fine, add the garlic pounded, pack into a large stone jar, cover with cold water slightly salted, and stand aside for twenty-four hours. Then drain in a colander and press until dry. Return to the jar and cover with the vinegar boiling hot, to which has just been added the spices. This pickle may be hermetically sealed while hot, or the vinegar reheated for two or three mornings.

**OILED PICKLES**

100 small cucumbers	1 quart of onions
$\frac{1}{4}$ pound of ground mustard	1 pint of olive oil
1 teaspoonful of black pepper	1 ounce of celery-seed
$\frac{1}{4}$ pound of whole mustard	2 quarts of vinegar

Pare the cucumbers and onions, and slice them in thin slices. Put a layer of cucumbers, then a layer of onions, then a heavy sprinkling of salt, then another layer of cucumbers, and so continue these alternations. On top, place a heavy weight to press them down; let stand over night, or at least six hours. Then drain off the liquor. Cover with cold vinegar. Stand for twenty-four hours. Drain. (This vinegar may be saved to use for other purposes.) Put the cucumbers and the onions into glass or stone jars. Mix the mustard, pepper and celery-seed with the oil, then add gradually the two quarts of vinegar, and pour over the cucumbers and onions. Fasten the jars, and in two weeks the pickles will be ready to use.

**GREEN TOMATO PICKLES**

1 $\frac{1}{2}$ ounces of black pepper	1 ounce of whole cloves
1 ounce of whole allspice	1 ounce of mustard-seed
$\frac{1}{4}$ pound of ground mustard	1 dozen onions, sliced
1 peck of green tomatoes, sliced	

Put a layer of tomatoes, then a layer of onions, then a sprinkling of salt, then another layer of tomatoes, and so on; let stand over night. Next

morning, drain off all the liquor, put them in a porcelain-lined kettle with all the other ingredients, cover with vinegar, and *simmer* gently fifteen minutes. Put away in stone or glass jars.

### RIPE TOMATO PICKLES

Choose small red or yellow tomatoes, prick them with a pin, put in glass or stone jars, add two or three dozen nasturtium-seeds to each quart of tomatoes, cover with good cold cider vinegar. They will be ready for use in about two weeks and will keep all winter.

### PICKLED WALNUTS

The walnuts should be gathered when very young and soft, soft enough to be easily pierced with a pin. They should be gathered in the middle of the day when the sun is hot upon them. Rub them with a coarse flannel. Then make a brine from salt and water, strong enough to bear an egg, and let them lie in it nine days, changing the brine every other day. At the end of this time, take them out, spread them on large dishes and expose them to the atmosphere for about thirty minutes. Pour over them boiling water, take them out one at a time, rub them with a piece of coarse flannel, and pierce them with a large needle in several places. Now place them in glass jars. To every hundred walnuts

allow one gallon of vinegar, one ounce of cloves, one ounce of allspice, one ounce of black pepper, a half-ounce of mace, and a half-ounce of nutmeg. Put the spices in the vinegar, and scald in a porcelain kettle for fifteen minutes. Then strain the vinegar, and pour it, boiling hot, over the walnuts; add a large tablespoonful of grated horseradish, and a cupful of mustard-seed. Cover closely and stand in a cool place.

#### TO SALT CUCUMBERS FOR PICKLING

Choose very small cucumbers as free from spots as possible. Put a layer of cucumbers in the bottom of a cask, then a layer of coarse salt, about a quarter of an inch thick, then another layer of cucumbers, another of salt, and so continue until all the cucumbers are used. Place a board on top of the pickles, on which put a heavy stone to keep the pickles down. If you raise your own cucumbers, gather them early in the morning, or late in the evening, as cutting them at midday will wilt the vines. After the stone is placed on the board, pour around about a quart of water to moisten the salt. This with the juice that exudes from the cucumbers should make sufficient brine to cover. A new supply of cucumbers may be added; simply remove the board and stone, and arrange in layers as before. A few cabbage leaves or horseradish tops may be placed

underneath the board. This will prevent molding. When the cask is nearly full, tuck a cloth closely around the edges, place board and weight on top of it, cover the cask, and the cucumbers will keep perfectly for one or two years.

When wanted for pickling, carefully lift the cloth with the scum, wash the board, the stone, and the cloth in clear warm water. Do not be alarmed at the heavy scum found. With a clean cloth wipe all the scum from the sides of the cask; take out as many as are wanted, return the cloth, board and weight, and cover closely as before.

Place the cucumbers taken out in a large vessel of cold water, soak three days, changing the water each day, then drain and wipe carefully, without bruising. Put a porcelain-lined kettle over the fire and fill half full of good cider vinegar, and as many cucumbers as the vinegar will cover, let the whole come to a boil, turning the cucumbers several times with a wooden spoon to prevent those in the bottom from becoming soft. After they are thoroughly heated, drain, and put them in a stone jar. Throw this vinegar away. Cover the cucumbers with fresh cold vinegar; spices may be added to taste. A tablespoonful of chopped horseradish will prevent molding. They will be ready for use in about a week.

String beans and green tomatoes sliced may be prepared in precisely the same manner.

**PICKLED CORN**

Corn, lima beans and string beans may be packed in salt precisely the same as cucumbers, and after soaking twenty-four hours, may be cooked the same as green vegetables, changing the water once or twice while boiling.

Many like this way of preserving vegetables better than canning.

The following is a list of vegetables, etc., and their season for pickling:

Artichokes—July and August.

Beans—July and August.

Cabbage—September.

Cabbage, red—September.

Cauliflower—August and September.

Celery—October and November.

Cucumbers—July to middle of August.

Martines—July and August.

Muskmelons—First to middle of September.

Nasturtiums—August and September.

Onions—August.

Parsley—October.

Peppers—August.

Tomatoes, green—September.

Tomatoes, ripe—August.

Walnuts—The early part of July, or the first week the walnuts form.

# CATSUPS

## CUCUMBER CATSUP

For this, choose large, ripe cucumbers. Pare, remove the seeds, and grate. To every pint of this pulp allow :

- $\frac{1}{2}$  pint of cider vinegar
- $\frac{1}{4}$  teaspoonful of cayenne
- 1 teaspoonful of salt
- 2 heaping tablespoonfuls of grated horse-radish

Drain the grated cucumber in a colander, then mix with all the other ingredients. Bottle and seal.

## MUSHROOM CATSUP

Take freshly gathered mushrooms and examine them carefully to see that they are all right. Wipe them, but do not wash. Put a layer of the mushrooms in the bottom of an earthen dish, then sprinkle well with salt, then another layer of mushrooms, another of salt, and so on alternately; cover with a folded towel, and stand in a very warm place for twenty-four hours; then mash and strain through a coarse bag. To every quart of this liquor

add one ounce of pepper-corns, and boil slowly in a porcelain-lined kettle for thirty minutes; then add a quarter-ounce of whole allspice, a half-ounce of sliced ginger-root, one dozen whole cloves, and three blades of mace. Boil fifteen minutes longer. Take from the fire and stand aside to cool. When cold, strain through flannel, and put into small bottles, filling to the very top. Cork tightly and dip in sealing-wax.

### **TOMATO CATSUP No. 1**

(Prof. Rachel Bodley)

Cut ripe tomatoes into thin slices; then put into a stone jar, a layer of tomatoes and a layer of salt, and stand aside for three days. Then press through a sieve, add vinegar, and spice to taste, bottle and seal.

### **TOMATO CATSUP No. 2**

For catsup, use tomatoes that are solid and free from decay. They should be gathered in August, as later in the season they lose their flesh, become watery and acid.

1 bushel of ripe tomatoes	2 ounces of mustard
$\frac{1}{2}$ gallon of vinegar	1 ounce of ginger
$\frac{1}{2}$ pound of sugar	$\frac{1}{2}$ ounce of cloves
$\frac{1}{2}$ pint of salt	$\frac{1}{8}$ ounce of cayenne
$1\frac{1}{2}$ ounces of black pepper	10 grains of powdered
$1\frac{1}{2}$ ounces of allspice	asafetida
1 pint of alcohol	

Put the tomatoes on to boil, boil gently a half-hour, then press them through a sieve to remove the seeds and skins. Return this liquid to the kettle (which should be porcelain-lined), and boil down to one and a half gallons; then add the vinegar and evaporate to one and three-quarter gallons; then add the sugar, salt and spices, stir until thoroughly mixed. Put the asafetida into a teacup, add to it two tablespoonfuls of the catsup, stir until thoroughly mixed, then turn it into the kettle, stir *continually* until the catsup comes to a boil, then take it from the fire and add the alcohol. Bottle and seal while hot.

### RED TOMATO CATSUP No. 3

- 1 bushel of sound, ripe tomatoes
- $\frac{1}{2}$  gallon of vinegar
- $\frac{1}{2}$  pint of salt
- 1 teaspoonful of the extract of black pepper
- 1 teaspoonful of the extract of allspice
- 1 teaspoonful of the extract of mustard
- 20 drops of oil of cloves
- 4 teaspoonfuls of paprika
- $\frac{1}{2}$  saltspoonful of cayenne
- $\frac{1}{4}$  saltspoonful of asafetida
- 1 ounce of green ginger

Wash the tomatoes, cut them into halves and press out the seeds. Put the flesh of the tomatoes into a porcelain-lined kettle, bring quickly to boiling-point, stirring every now and then. As soon as they are soft, in about twenty minutes, press them

through a sieve to remove the skins. Return this liquid to the kettle, boil it down rapidly to one and a half gallons, then add the vinegar and boil again until you have one and a half gallons; this you can judge by measuring the kettle before you put in the tomatoes. Take it from the fire and add all the spices. Put the asafetida in a teacup, dip out one or two tablespoonfuls of catsup and mix thoroughly, then stir it in with the other ingredients, and stir *continually* until the catsup comes to a boil. Take from the fire and put at once into clean bottles, cork with scalded, clean corks, and dip while hot into sealing wax.

#### COLD TOMATO CATSUP (Chili Sauce)

This recipe has been in constant use in my own family for years, and is pronounced perfect by those who have used it.

Peel and chop very fine a half-peck of ripe tomatoes. Drain them in a colander, then turn them into an earthen vessel and add a half-cup of grated horseradish, one cup of salt, one cup of black and white mustard-seed mixed, two tablespoonfuls of black pepper, two red peppers and two roots of celery chopped fine, two teaspoonfuls of celery-seed, one cup of nasturtiums chopped fine, one cup of brown sugar, two tablespoonfuls of ground cloves, two tablespoonfuls of ground all-

spice, a teaspoonful of cinnamon, a teaspoonful of mace, and one quart of cider vinegar. Mix all well together, bottle, and seal.

### WALNUT CATSUP

Take one hundred green walnuts that are young enough to be pierced through easily with a pin. Pierce each walnut in five or six places, then put them in an earthen vessel, cover with a half-pound of salt and two quarts of vinegar. Cover and stand aside for six days, mashing with a potato-masher and stirring every day. At the end of that time, strain off and squeeze every drop of liquor from the walnuts. Add a half-pint of vinegar to the remaining husks, beat them with a potato-masher and squeeze again. Turn all this liquor into a porcelain-lined kettle, add to it one ounce of whole peppercorns, forty whole cloves, slightly bruised, a quarter-ounce of whole mace, a quarter-ounce of nutmeg cut in thin slices, a small root of horseradish cut in slices, one blade of garlic chopped, one long red pepper, a half-ounce of anchovies, and a quarter-ounce of green ginger-root cut in slices. Bring this mixture slowly to a boil, cover the kettle closely, and boil slowly a half-hour. Then strain through a cloth and stand aside to cool. When cold, add one pint of port wine; bottle, cork tightly, and seal. This should stand three or four months before using.

**MIXED SAUCE**

- 1 gill of walnut catsup
- 4 tablespoonfuls of essence of anchovy
- ½ ounce of grated lemon-peel
- ½ ounce of garlic
- 1 ounce of horse-radish
- ½ ounce of black pepper
- 1 even teaspoonful of celery-seed
- 1 even teaspoonful of curry powder
- 1 gill of mushroom catsup
- ½ pint of port wine

Pound or grind the celery-seed; grate the horse-radish, and mix all the ingredients together. Bottle and cork tightly, and shake well every day for two weeks, then strain through a very fine muslin, bottle, cork, and seal. This is a very relishing sauce, and very wholesome.

**IMITATION OF WORCESTERSHIRE SAUCE**

Add to one quart of vinegar three-quarters of an ounce of cayenne, three cloves of garlic chopped fine, five anchovies mashed, twelve whole cloves bruised, and two blades of mace. Cover, and stand aside over night. Next day, rub through a fine sieve, strain, add one gill of port wine and one of soy, put it in a demijohn, cork, and stand aside for ten days; then bottle, cork, and seal.

**KITCHEN BOUQUET**

This is simply a flavored caramel that is used for the coloring of soups, sauces and stews. A made preparation under this name may be purchased at any first-class grocery store. The home-made preparation, however, is very nice, is easily made, and will keep for a year.

Put a half-pound of sugar into an iron saucepan and stir it over the fire until it melts and burns; when a very dark brown add a half cupful of boiling water, stir until the sugar is again dissolved, then add one chopped carrot, a chopped onion, a teaspoonful of salt, a saltspoonful of black pepper and two bay leaves. *Simmer* gently for thirty minutes, strain and put at once into small, clean bottles; cork while hot, and seal.

## FLAVORED VINEGARS

### CELERY VINEGAR

$\frac{1}{4}$  pound of celery-seed      1 quart of cider vinegar  
1 teaspoonful of salt      2 teaspoonfuls of granulated sugar

Mix all the ingredients together, put in a porcelain-lined kettle and bring to boiling-point. When cold, put in a large bottle, and shake every day for two weeks. Then strain through a fine cloth or filter; bottle, and cork tightly.

### CHILI VINEGAR

This is made by infusing fifty of the small foreign bird-peppers (small red and yellow peppers about one inch long) in one pint of the best white wine vinegar for two weeks.

### HORSERADISH VINEGAR

(Marion Harland)

1 tablespoonful of white sugar      1 quart of vinegar  
6 tablespoonfuls of scraped or grated horse-radish

Scald the vinegar; pour boiling hot over the horse-radish. Steep a week, strain and bottle.

### ONION VINEGAR

1 quart of vinegar      2 teaspoonfuls of white sugar  
1 teaspoonful of salt    2 large Spanish onions

Grate the onions, mix with them the salt and sugar, let stand two hours, and add the vinegar. Turn into bottles, and shake every day for two weeks. Then strain through a fine cloth, bottle, and cork.

This may be used for salads, etc., where a very delicate onion flavor is desired.

### TARRAGON VINEGAR

Put into a wide-mouthed bottle one cup of freshly-gathered tarragon leaves, cover with a quart of good cider vinegar; cork the bottle and stand aside for two weeks, shaking frequently; then boil, strain and squeeze through a flannel bag. Pour into small bottles, cork, and keep in a cool place.

This is an agreeable addition to all salad and fish sauces.

### SALAD VINEGAR

For daily use for French dressing a spiced vinegar gives zest to the salad. Wash two cloves of garlic, grate one onion, add a quarter teaspoonful of celery-seed, one whole clove, and four bay leaves. Cover with one quart of good vinegar and fasten. Shake each day for three weeks and strain. Bottle for use.

## POWDERS AND DRIED HERBS

### CURRY POWDER

3 ounces of turmeric	1 ounce of mustard
3 ounces of coriander-seed	$\frac{1}{2}$ ounce of allspice
1 ounce of black pepper	$\frac{1}{2}$ ounce of cardamom-seed
1 ounce of ginger	$\frac{1}{4}$ ounce of cumin-seed

Pound all the ingredients in a mortar until reduced to a fine powder. Sift, bottle, and cork.

### GUMBO FILLET POWDER

Take the very young tender leaves of the sassafras, spread them out on white paper, and dry in a cool, dry, airy place. When dry, pound in a mortar, press through a hair sieve, and keep in a closely corked bottle.

### RAGOUT POWDER

$\frac{1}{2}$ ounce of ground mustard	$\frac{1}{4}$ ounce of nutmeg, grated
$\frac{1}{4}$ ounce of ground mace	$\frac{1}{2}$ ounce of black pepper
$\frac{1}{4}$ ounce of ground cloves	$\frac{1}{2}$ ounce of dried lemon-peel,
$\frac{1}{4}$ ounce of ground ginger	grated
1 ounce of salt	Dash of cayenne

Mix all well together, rub through a fine sieve, bottle, and cork.

A teaspoonful of this powder added to a sauce or ragout gives an agreeable flavor.

### SOUP POWDER

Take of lemon-peel, thyme, sweet marjoram and parsley one ounce each. Dry carefully in a warm oven; then pound in a mortar, and rub through a fine sieve, then add one drachm of powdered celery-seed. Bottle and cork. One teaspoonful of this may be added to each quart of soup.

### TO DRY HERBS

It is of the utmost importance to pick or purchase the herbs when in the highest state of perfection, this is when full of juice, just before flowering. They should be gathered on a dry day. Cleanse thoroughly from dust and dirt, cut off the roots, spread on brown paper, and put them in a warm oven, that they may dry quickly to preserve their flavor. Great care must be taken that they do not burn. When dry, rub the leaves from the stems, put into bottles or jars, and cork tightly. They should be perfectly cold before bottling.

---

**SOUP COLORING AND FLAVORING**

Chop fine one onion, one carrot, a parsnip, a sweet potato, two cloves of garlic, add a half teaspoonful of sage, same of parsley, a half-teaspoonful of all-spice, a red pepper. Burn very brown a cup of sugar by stirring it dry over the fire until it melts and burns; add an equal quantity of water, cook a moment and add the vegetables and spices. Cover and *simmer* very slowly for a half hour, strain and bottle. Use a half teaspoonful to color sauces and soups.

**SOME OTHER BOOKS**  
Published by  
**Arnold and Company**

*Mrs. Rorer's*  
**NEW Cook Book**

A big book of 731 pages, abundantly illustrated. Its bigness is no criterion of its goodness. The fact that it is the best work of the best years of Mrs. Rorer's life; that it is a complete new book telling of the things one needs to know about cooking, living, health, and the easiest and best way of housekeeping—these are what make for goodness, and place this book far in advance of any other of a like nature.

The New Cook Book covers all departments of cookery. A masterly exposition of each subject is given, followed by recipes for the proper preparation, cooking and serving of the various kinds of foods. There are over 1500 recipes in the book.

The illustrations are an important feature. One set of pictures shows the proper dressing of the table during a course dinner. Then there is a complete set showing the method of carving meats, poultry, game, etc.; and many others illustrating special features of the book.

# *Mrs. Rorer's*

## *Philadelphia Cook Book*

This is the standard book of Mrs. Rorer's that has been before the public for a number of years. It has no connection with Mrs. Rorer's New Cook Book. Each book is independent of the other, and the possession of one forms no reason for doing without the other.

The Philadelphia Cook Book is full of good things, and, like all of Mrs. Rorer's works, is eminently practical. It is a standard of excellence, in that it is full of the brightest things in cookery; the recipes are absolutely reliable, and the general instructions to housekeepers of the most helpful and necessary character.

Nearly all cook books assume some knowledge and experience on the part of those who use them, but Mrs. Rorer makes her explanations so clear, and gives such definite directions, as to quantities, that the beginner has no difficulty in successfully accomplishing all the book calls for. Then there are frequent hints as to the proper use of left-overs, how to market, and, in many ways, information is given that is alike useful to the experienced cook as to the tyro in matters culinary.

The book is full of choice recipes, every one of which has been successfully tested by Mrs. Rorer and found to come out right. This alone is of incalculable benefit and ought to commend the book to the favorable consideration of every housekeeper.

The use of this book in the home means better health, better living, economy in the use of food, and a consequent saving in dollars and cents.

**12mo, nearly 600 pages, with portrait of author;  
bound in cloth, \$1.00 net; by mail, \$1.15**

# *Mrs. Rorer's Vegetable Cookery and Meat Substitutes*

*This book has a twofold object:*

1. To show the value of vegetables in their relation to diet and health, how to prepare, cook and serve them, what to eat under certain conditions of health, and thus have them perform their proper work.
2. To give to the prudent housewife a knowledge of combinations of foods in the shape of toothsome recipes to take the place of meat, or as we call them—Meat Substitutes.

It goes without saying that we all know too little about the value of vegetables as food. We eat them because they are palatable, not realizing their immense importance as body builders. Here they are classified, and thus made to give us a right idea of their use.

Then as to Meat Substitutes. It is not necessary to be a vegetarian to desire a change from a meat diet. There are health reasons often demanding abstention from meats; or economy may be an impelling motive; or a desire for change and variety in the daily bill of fare may be warrant enough. However we look at it here is the wonder book to point the way to better and healthier living.

There is an abundance of the choicest and most palatable recipes, and they are given in such a manner, that if the directions are followed, the results are sure. You cannot make mistakes.

**12mo, cloth, \$1.50 net ; by mail, \$1.65**

## *Mrs. Rorer's Every Day Menu Book*

In the course of her teaching and editorial work, there have come to Mrs. Rorer frequent requests for a book that will provide a daily bill of fare, one that will be at once rational, its directions easy of accomplishment, and give an excellent variety. Hence this Menu Book.

It contains a menu for every meal in the year, systematically arranged by months and days; menus for special occasions, such as holidays, weddings, luncheons, teas, etc.; illustrations of decorated tables for various social events, with appropriate menus; menus arranged for the seasons both as to food and decorations; a department of menus without meats. A fine volume that ought to commend itself to every housekeeper.

**12mo, 300 pages, handsomely illustrated; bound in cloth \$1.50 net; by mail, \$1.65**

## *Mrs. Rorer's Cakes, Icings and Fillings*

Every one is interested in the cake problem. There is possibly no item in the home bill of fare on which a woman prides herself as the ability to make a good cake. But how to add variety to the goodness? Here's the book to help. Contains a large number of enticing and valuable recipes for cakes of all sorts and conditions. Some need filling, some need icing—well, here you have all the necessary information. Best of all, there is no fear as to results. Follow the directions and your cake is bound to come out right.

**12mo, cloth, 50 cents net; by mail, 55 cents**

## *Mrs. Rorer's Canning and Preserving*

The only book on the subject worth the name. In it Mrs. Rorer discusses at length the canning and preserving of fruits and vegetables, with the kindred subjects of marmalades, butters, fruit jellies and syrups, drying and pickling. The recipes are clearly and simply given. In the new edition now presented, the author has brought the book up to date, and has included many new, rare and original recipes that have been accumulating since the book was first introduced. It has always been a favorite book with the public, and now it will be doubly welcome.

*New Edition: revised and rewritten, with  
the addition of much new matter*

## *Mrs. Rorer's My Best 250 Recipes*

It would be strange indeed if, out of the multitude of recipes Mrs. Rorer has invented and used during her long career as a teacher, writer and lecturer, she did not have some that appealed to her more strongly than others. She has gathered these together, classifying them under their different heads. There are Best 20 Soups; Best 20 Fish Recipes; Best 20 Meats; Best 20 Salads; Best 20 Desserts; Best 20 Sauces, Vegetables, Fruit Preserves, Luncheon Dishes, Ices, Summer Recipes, Left Overs, Game and Poultry, Breads and Biscuits, etc.

12mo, cloth, 75 cents net; by mail, 80 cents

## *Mrs. Rorer's New Salads*

For Dinners, Luncheons, Suppers and Receptions.  
With a group of ODD SALADS and some CEYLON SALADS.

A salad made from a succulent green vegetable and French dressing, should be seen on the dinner table in every well-regulated household three hundred and sixty-five times a year. These green vegetables contain the salts necessary to the well being of our blood; the oil is an easily-digested form of fatty matter; the lemon juice gives us sufficient acid; therefore simple salads are exceedingly wholesome.

During the summer, the dinner salad may be composed of any well-cooked green vegetable, served with a French dressing; string beans, cauliflower, a mixture of peas, turnips, carrots and new beets, boiled radishes, cucumbers, tomatoes, uncooked cabbage, and cooked spinach. In the winter serve celery, lettuce, endive and chicory.

*New Edition: revised and rewritten, with  
the addition of much new matter*

## *Mrs. Rorer's Dainties*

Possibly no part of the daily bill of fare so taxes the ingenuity of the housewife as the dessert, that final touch to the meal that lingers in the palate like a benediction. We tire of constant repetitions of familiar things. We want variety. Why not have it when there are so many ways and means of gratifying our tastes. Mrs. Rorer has given here a number of choice things covering quite a range of possibilities.

*New Edition: revised and rewritten, with  
the addition of much new matter*

## *Mrs. Rorer's Many Ways for Cooking Eggs*

Did you ever reflect what an important part eggs play in our domestic economy? When from any reason other things fail, the perplexed housewife knows she can do something to tide over her difficulties by the use of eggs. But how many know the great possibilities that lie in an egg—the very many ways of cooking and preparing them for the table? To many, boiled, fried, poached and scrambled form the limit of their knowledge. But get this book and you'll be surprised at the feast in store for you. You'll also find recipes for delectable Egg Sauces.

12mo, cloth, 50 cents net ; by mail, 55 cents

## *Mrs. Rorer's Made-Over Dishes*

How to transform the left overs into palatable and wholesome dishes. With many new and valuable recipes.

We quote from the author's introduction:

"Economical marketing does not mean the purchase of inferior articles at a cheap price, but of a small quantity of the best materials found in the market; these materials to be wisely and economically used. Small quantity and no waste, just enough and not a piece too much, is a good rule to remember. In roasts and steaks, however, there will be, in spite of careful buying, bits left over, that if economically used, may be converted into palatable, sightly and wholesome dishes for the next day's lunch or supper.

## *Mrs. Rorer's* *How to Use a Chafing Dish*

Of all the useful and dependable articles of food, commend us to the Sandwich. Nothing in the whole range of foods presents such a wonderful opportunity for variety. The sandwich is the handy thing for suppers, teas, social calls, school lunch baskets, picnics—but where can you not use it to advantage and enjoyment? In this book Mrs. Rorer has given a lot of new, original recipes, with some very odd ones. She has drawn upon her wonderful knowledge and inventive faculty and the result is a bewildering array of delectable sandwiches.

*New Edition : revised and rewritten, with  
the addition of much new matter*

## *Mrs. Rorer's Sandwiches*

It is wonderful the amount of pleasure and satisfaction that can be had with a Chafing Dish. Few people know how to use one successfully, although the art is easily acquired. This book, for instance, gives the proper directions for making hosts of good things, and if they are followed implicitly, the most inexperienced person can be sure of results. It is a handy thing in an emergency, and it forms a delightful adjunct to a supper or dinner. Guests are always interested in watching the evolution of some delectable dish, and the head of the table has a chance to show his or her skill.

*New Edition : revised and rewritten, with  
the addition of much new matter*

12mo, cloth, 50 cents net ; by mail, 55 cents

## *Mrs. Rorer's Hot Weather Dishes*

Its name tells the whole story. It is the only book of the kind published. Hot weather seems to suspend the inventive faculty of even the best housekeepers, and at a season when the appetite needs every help and encouragement, this book will be found of the greatest use.

12mo, cloth, 50 cents net ; by mail, 55 cents

## *Mrs. Rorer's Home Candy Making*

A veritable book of sweets, full of choice recipes, with complete instructions for making the many delicacies that delight both young and old. It is the result of careful practice in teaching beginners how to make attractive and wholesome varieties of home-made candies. The excellence of the recipes consists in their simplicity and faithfulness to details.

12mo, cloth, 50 cents net ; by mail, 55 cents

## *Mrs. Rorer's Bread and Bread-Making*

The object of this book is two-fold. First, to give in a concise and easily-managed form a set of recipes used in every household every day. Secondly, to point out the reasons why failures so often occur, even with perfect recipes, and how to guard against them.

12mo, cloth, 50 cents net ; by mail, 55 cents

## *Mrs. Rorer's Quick Soups* *New Ways for Oysters*

These two books were written in response to requests for information on the subjects. Designed to meet the special wants of a numerous class of housekeepers who are given to entertaining, and are so often at loss to know what and how to prepare for their guests. The housekeeper will find them very handy

24mo, cloth, 25 cents net ; by mail, 30 cents

## *Household Accounts*

A simple method of recording the daily expenses of the family. The book contains ruled pages, systematically and simply divided into spaces in which are kept the purchases for each day of milk, butter, eggs, meat, groceries, vegetables, etc. The daily expenses total up for the months, and the months for the year. There are other forms for recording expenses of help, light, heat and general household expenditures in table and bed linens, china and kitchen utensils, etc.

Manilla boards, 25 cents net ; by mail 30 cents

## *Cakes, Cake Decorations* *and Desserts*

By CHARLES H. KING. The author tells his methods in his own practical way, and gives abundant recipes. The book is illustrated by engravings of numerous decorated pieces, and has a silhouette chart
